*Inclusion and Exclusion in Competitive Sport* Seema Patel, 2015-04-24 Society is obsessed with categorising and treating individuals and groups according to their physical and non physical differences such as sex gender disability and race This treatment can lead to the inclusion or exclusion of an individual from the tangible and intangible benefits of society Where this practice becomes discriminatory legal frameworks can protect human rights and ensure that people are treated with due respect for their similarities and differences In a sporting context the inclusion and exclusion of athletes based upon their differences is often a necessary part of the essence of competitive sporting activity arranged around rules and categories that can have an unequal exclusionary impact on certain classes of individual

Dominant sporting cultures can also have exclusionary effects This important and innovative book seeks to investigate the socio legal and regulatory balance between inclusion and exclusion in competitive sport It critically analyses a range of legal and non legal cases concerning sport specific inclusion and exclusion in the areas of sex gender disability and race including those cases involving Oscar Pistorius Caster Semenya and Luis Suarez to identify the extent to which the law and sport adopt a justifiable and legitimate inclusive or exclusive approach to participation The book explores national and international regulatory frameworks identifying deficiencies and good practice and concludes with recommendations for regulatory reform Inclusion and Exclusion in Competitive Sport is important reading for anybody with an interest in the relationship between sport and wider society sports development sport management sports law or socio legal studies Brief Interventions for Risky Drinkers Antoni Gual, Peter Anderson, Hugo López-Pelayo, Jillian Reynolds, 2016-06-29 Alcohol is the sixth leading risk factor for disability and premature death all over the world and one of the leading causes of premature mortality in western societies it is a leading risk factor for death in young and middle age males Heavy drinking accounts for about two thirds of the burden of disease attributable to alcohol In the early 1980s screening and brief interventions SBI in primary health care settings were proposed as effective strategies to identify risky drinkers and to help them reduce their drinking Since then a growing body of evidence including several meta analysis and Cochrane reviews has shown the efficacy and effectiveness of SBI in primary health settings However demonstrating the effectiveness of SBI has not been insufficient to facilitate its general implementation in the routines of primary health care physicians and in fact the dissemination of SBI has proven to be a difficult business Qualitative and quantitative research has identified most of the facilitators and barriers for its implementation and publicly funded research has been earmarked to address the dissemination problems worldwide Some examples are the World Health Organization Phase III and Phase IV studies on the identification and management of alcohol related problems in primary care EU funded projects PHEPA AMPHORA ODHIN BISTAIRS the UK SIPS trials and the SBIRT developments sponsored by the Substance Abuse what length should they be is there a need for booster sessions is there added value of a motivational approach These questions together with other relevant aspects of SBI need ongoing research In recent years SBIs have been tested in settings other than primary health care including hospitals accident and emergency rooms criminal justice colleges and universities social services and pharmacies In some of those areas the evidence is scarce for example pharmacies while in others it is very promising for example students and hospitals New technologies have also offered the possibility of online tools and in the last few years different digital based applications have been tested successfully as new ways to deliver effective SBIs to larger amounts of people Brief interventions have also spread to drugs other than alcohol This book aims to be an update of the state of the art of brief advice It is a compilation of articles published by some of the most relevant researchers in the field in *Frontiers in Psychiatry* between 2014 and 2016
