Proceedings of the 13th International Congress on

Mathematical Education Gabriele Kaiser, 2017-10-31 This book is open access under a CC BY 4.0 license. The book presents the Proceedings of the 13th International Congress on Mathematical Education ICME 13 and is based on the presentations given at the 13th International Congress on Mathematical Education ICME 13. ICME 13 took place from 24th to 31st July 2016 at the University of Hamburg in Hamburg, Germany. The congress was hosted by the Society of Didactics of Mathematics Gesellschaft für Didaktik der Mathematik GDM and took place under the auspices of the International Commission on Mathematical Instruction ICMI. ICME 13 brought together about 3,500 mathematics educators from 105 countries; additionally, 250 teachers from German-speaking countries met for specific activities. Directly before the congress activities were offered for 450 Early Career Researchers. The proceedings give a comprehensive overview on the current state of the art of the discussions on mathematics education and display the breadth and deepness of current research on mathematical teaching and learning processes. The book introduces the major activities of ICME 13, namely articles from the four plenary lecturers and two plenary panels, articles from the five ICMI awardees, reports from six national presentations, three reports from the thematic afternoon devoted to specific features of ICME 13. Furthermore, the proceedings contain descriptions of the 54 Topic Study Groups which formed the heart of the congress and reports from 29 Discussion Groups and 31 Workshops. The additional important activities of ICME 13, namely papers from the invited lecturers, will be presented in the second volume of the proceedings.

Twenty-Twenty Hindsight

Mosiua Sekese, 2013-05-16 Twenty-Twenty Hindsight means perfect understanding of events only after they have happened. In his book, Mosiua Sekese looks back on his life in the old and new South Africa and gives his own perceptive interpretation of the past events. Sekese suffered discrimination and prejudice under the old apartheid government as well as the new democratic regime. His story is highly personal but provides the reader with unique insights into the social and educational challenges that South Africa continues to grapple with. I had a quick read and I find the content heartbreaking but fascinating. Especially as a white South African, you are drawing me into a world that I always knew existed but which few people have the guts and conviction to paint into words. Louise Heystek

Teaching Mathematics to Deaf Children

Terezinha Nunes, 2004-09-24 From an early age, deaf children excel in thinking about and remembering what they learn through visual spatial instruction. This strength in information processing can be used in the mathematics classroom to achieve better learning outcomes. This book discusses ways to teach deaf children about the four arithmetic operations through spatial representation in problem solving. Examples for the teaching of fractions and graphs are also included. These visual representations are useful to support the children's understanding of mathematical concepts and to promote peer collaboration. The teaching programme was tested with deaf children in six schools with excellent results; the children in the project made significantly more progress in one school year than expected for either deaf and hearing children over the same time. This work was made possible through the

Counselling Jacobus G. Maree,2019-07-20 This book examines a topic widely regarded as the most pressing in career
counselling today i e how to ensure that everyone receives career counselling and that all workers have the opportunity to
engage in sustainable decent work The author holds that career counselling should not only advance workers self and career
construction helping them design successful career lives and make social contributions and live purposeful lives it should
also expound new theoretical approaches and interventions Furthermore the book criticizes global society for overlooking the
basic needs of many workers especially the most vulnerable and disadvantaged An important feature of the book is its
emphasis on promoting a creative and innovative approach to career counselling so as to better answer contemporary career
related questions It offers guidance on how to advance entrepreneurship and help workers develop critical thinking curiosity
creativity collaboration and communication skills In this way the book promotes innovation in career counselling and maps
the way forward in a theoretical and practical manner that helps clients flourish rather than merely survive in turbulent
times impacted by the fourth wave in psychology career counselling the economy as well as the 4th industrial revolution
