Competence Assessment in Education Detlev Leutner, Jens Fleischer, Juliane Grünkorn, Eckhard Klieme, 2017-03-27 This book addresses challenges in the theoretically and empirically adequate assessment of competencies in educational settings. It presents the scientific projects of the priority program Competence Models for Assessing Individual Learning Outcomes and Evaluating Educational Processes which focused on competence assessment across disciplines in Germany. The six year program coordinated 30 research projects involving experts from the fields of psychology, educational science and subject specific didactics. The main reference point for all projects is the concept of competencies which are defined as context specific cognitive dispositions that are acquired and needed to successfully cope with certain situations or tasks in specific domains. Koeppen et al 2008 p 62. The projects investigate different aspects of competence assessment. The primary focus lies on the development of cognitive models of competencies complemented by the construction of psychometric models based on these theoretical models. In turn the psychometric models constitute the basis for the construction of instruments for effectively measuring competencies. The assessment of competencies plays a key role in optimizing educational processes and improving the effectiveness of educational systems. This book contributes to this challenging endeavor by meeting the need for more integrative interdisciplinary research on the structure levels and development of competencies.

The Attack on Nova Scotia Schools Grant Frost, 2020-04-07 Nova Scotia's public schools and their students have faced dramatic conflict and drastic change over the past 25 years. While critics charge that schools are failing kids, teachers have been under attack from think tanks and politicians. Parents and citizens have seen power centralized after democratically elected school boards were abolished. Grant Frost offers an insider's account of these tumultuous years and offers an explanation for the turmoil. Behind the conflict he discovers right wing think tanks that relentlessly seek to discredit public education and teachers while pushing for changes that would benefit corporations who want willing workers. The think tanks are also promoters of the charter school movement that continues to gain ground in the US and that is promoted as a better option than public schools. Whether it's Nova Scotia's own right wing think tank or local journalists who readily adopt the cry that our schools are failing, Grant Frost traces the path that he finds has threatened the quality of schooling in Nova Scotia. He sets out the steps for parents, teachers and other citizens to ensure that public education is championed and protected in Nova Scotia.

Discrimination based on Colour, Ethnic Origin, Language, Religion and Belief in Turkey's Education System Nurcan Kaya, 2015-10-27 The Turkish government is urged to make a fundamental shift in its approach to education by Minority Rights Group International (MRG) in a new report. A long standing focus on state building has been supplemented by increasing emphasis on religious teaching. Both feature strongly in the education system in Turkey making schools a focus of discrimination. The report 'Discrimination based on Colour, Ethnic Origin, Language, Religion and Belief in Turkey's Education System' reveals evidence of discrimination of minority groups and suggests comprehensive

reforms to effectively ensure equality The national education system which for decades aimed to create young Turkish nationalists has in recent years become a vehicle for raising young religious Turkish nationalists says Nurcan Kaya Turkey Coordinator of Minority Rights Group International Religious education is compulsory from grade four in primary schools While some information on world religions has been introduced the emphasis remains on teaching Sunni Muslim religious practices Children of Jewish and Christian families may apply to opt out but the process can be cumbersome and in many schools alternatives are not provided for them Non Muslim students who have opted out can still find themselves having to remain in the religious instruction class or alternatively having to wander in the school corridor making them vulnerable to taunts from pupils and even teachers The opt out possibility is still not available to children of other minorities Another issue is mother tongue education In 2012 a new elective on the living languages and dialects in Turkey was introduced but due to various limitations minorities remain marginalised others in the education system Subsequent to the 2012 reform the report monitors discrimination in the formal education system in the period of the academic year of 2014 2015 The findings are based on the field work of the Monitoring Discrimination in Education Network an alliance of 16 organizations working in Turkey The report compiles numerous cases of discrimination based on language religion ethnicity skin colour and the level of income In order to bring about a fundamental solution to these problems in the education system the government must prioritise developing an approach that sees all groups as equal and that responds to demands for rights based on such an understanding of equality says Kaya The report highlights that Turkey has no anti discrimination law or an equality commission to which victims of discrimination can apply The existing legislation contains no effective and accessible means of judicial remedies or compensation Therefore many discriminatory practices are not reported to school administrations The entire education system is based on Turkishness Non Turkish groups are either not referred to or referred in a negative way says Kaya Education system has played a significant role in deepening conflict in society The positive representation of other groups in the education system would contribute to social peace and harmony In order to resolve the many problems in the education system that the current approach causes the overall aim of government education policy should be cleared of ideological references and the protection of children s best interests and the right to education in line with international standards should be considered its fundamental goal says the report
