DeVaney,2025-07-26 In this book Leif DeVaney brings the traditional philosophical branches of metaphysics and ethics to bear on conservation biology While many previous attempts at asking and answering ethical questions related to conservation and other environmentally relevant activities exist few such attempts have engaged adequately with the rock bottom approach of metaphysics Through this metaphysically realistic lens the ontological status of the population as well as other ecological wholes is challenged DeVaney argues that individual nonhuman animals are found to have interests that parallel human interests These include the biotic goals of survival and reproduction as well as freedom from undue pain and suffering From an ethical standpoint the conclusion differs drastically from the dominant consequentialist contention that the good of some can be sacrificed for the supposed greater good of the many DeVaney initiates the establishment of the subdiscipline of conservation metaphysics which naturally leads to a theoretically grounded ethic      **Biology** Michael Windelspecht,Sylvia Mader,2012-01-03 The Mader Windelspecht Story Biology is a comprehensive introductory biology textbook for non majors or mixed majors courses that covers biology in a traditional order from the structure and function of the cell to the organization of the biosphere The book which centers on the evolution and diversity of organisms is appropriate for a one or two semester course The eleventh edition is the epitome of Mader s expertise Its concise precise writing uses an economy of words to present the material as succinctly and clearly as possible thereby enabling students even non majors to understand the concepts without necessarily asking the instructor to explain further Sylvia Mader represents one of the icons of science education Her dedication to her students coupled with her clear concise writing style has benefited the education of thousands of students over the past three decades Dr Michael s Windelspecht The integration of text and the digital world are now complete with the addition of Michael s Windelspecht s expertise in the development of digital learning assets For over ten years Michael served as the Introductory Biology Coordinator at Appalachian State University in Boone NC where he directed a program that enrolls over 4 500 non science majors annually Michael has acted

as the leading architect in the design of the Mader media content for McGraw Hill's Connect and LearnSmart. These assets allow instructors to easily design interactive tutorial materials, enhance presentations in both the online and traditional environments, and assess the learning objectives and outcomes of your course. Users who purchase Connect receive access to the full online eBook version of the textbook.

Monographic Series Library of Congress, 1981 Environmental Archaeology Elizabeth Reitz, Myra Shackley, 2012-06-05

One of the most significant developments in archaeology in recent years is the emergence of its environmental branch: the study of humans' interactions with their natural surroundings over long periods and of organic remains instead of the artifacts and household items generally associated with sites. With the current attention paid to human responsibility for environmental change, this innovative field is recognized by scientists, conservation and heritage managers, and policymakers worldwide. In this context comes *Environmental Archaeology* by Elizabeth Reitz and Myra Shackley, updating the seminal 1981 text *Environmental Archaeology* by Myra Shackley. Rigorously detailed yet concise and accessible, this volume surveys the complex and technical field of environmental archaeology for researchers interested in the causes, consequences, and potential future impact of environmental change and archaeology. Its coverage acknowledges the multiple disciplines involved in the field, expanding the possibilities for using environmental data from archaeological sites to enriching related disciplines and improving communication among them. Introductory chapters explain the processes involved in the formation of sites, introduce research designs and field methods, and walk the reader through biological classifications before focusing on the various levels of biotic and abiotic materials found at sites, including sediments and soils, viruses, bacteria, archaea, protists, and fungi, bryophytes and vascular plants, wood, charcoal, stems, leaves, and roots, spores, pollen, and other microbotanical remains, arthropods, molluscs, echinoderms, and vertebrates, stable isotopes, elements, and biomolecules. The updated *Environmental Archaeology* is a major addition to the resource library of archaeologists, environmentalists, historians, researchers, policymakers, anyone involved in studying, managing, or preserving historical sites. The updated *Environmental Archaeology* is a major addition to the resource library of archaeologists, environmentalists, historians, researchers, policymakers, anyone involved in studying, managing, or preserving historical sites.

**Mader, Biology © 2013, 11e, AP Student Edition (Reinforced Binding)** Sylvia Mader, 2012-01-06

Biology's focus on inquiry-based learning, coupled with its precise writing style, hallmark art program, and integration of text and digital, make it the perfect solution for today's AP Biology classroom. Mader's Biology program also provides valuable supplemental materials to help aid student success in the AP Biology Course, sold separately. Biology begins with an introductory chapter that helps to familiarize students with the AP Biology Curriculum by explaining each Big Idea through the use of thought-provoking examples. This chapter also introduces students to the science practices to students and reviews the process of science. Each Unit Opener has been written to pinpoint how the chapters in the Unit relate to the AP Curriculum and the Big Ideas, while each chapter opener provides the students with Essential Questions to help guide their reading. The features within the text
