

outside manufacturer would pay for all shipping costs; the variable selling expenses would be only two-thirds of their present amount. Compute the unit cost that is relevant for comparison to the price quoted by the outside manufacturer.

PROBLEM 13-23 Make or Buy Analysis [LO3]

"In my opinion, we ought to stop making our own drums and accept that outside supplier's offer," said Wim Nieuwindt, managing director of Antilles Refining, N.V., of Aruba. "At a price of 18 florins per drum, we would be paying 5 florins less than it costs us to manufacture the drums in our own plant. (The currency in Aruba is the florin, denoted below by fl.) Since we use 60,000 drums a year, that would be an annual cost savings of 300,000 florins." Antilles Refining's present cost to manufacture one drum is given below (based on 60,000 drums per year):

Direct materials	fl10.35	
Direct labor	6.00	5.17
Variable overhead	1.50	1.25
Fixed overhead (\$2.80 general company overhead, fl1.60 depreciation and, fl0.75 supervision)	5.15	
Total cost per drum	fl23.00	

A decision about whether to make or buy the drums is especially important at this time since the equipment being used to make the drums is completely worn out and must be replaced. The choices facing the company are:

Alternative 1: Rent new equipment and continue to make the drums. The equipment would be rented for fl135,000 per year.

Alternative 2: Purchase the drums from an outside supplier at fl18 per drum.

The new equipment would be more efficient than the equipment that Antilles Refining has been using and, according to the manufacturer, would reduce direct labor and variable overhead costs by 10%. The old equipment has no resale value. Supervision cost (fl45,000 per year) and direct materials cost per drum would not be affected by the new equipment. The new equipment's capacity would be 90,000 drums per year.

The company's total general company overhead would be unaffected by this decision.

Required:

- To assist the managing director in making a decision, prepare an analysis showing the total cost and the cost per drum for each of the two alternatives given above. Assume that 60,000 drums are needed each year. Which course of action would you recommend to the managing director?
- Would your recommendation in (1) above be the same if the company's needs were: (a) 75,000 drums per year or (b) 90,000 drums per year? Show computations to support your answer, with costs presented on both a total and a per unit basis.
- What other factors would you recommend that the company consider before making a decision?

PROBLEM 13-24 Utilization of a Constrained Resource [LO5]

The Walton Toy Company manufactures a line of dolls and a doll dress sewing kit. Demand for the dolls is increasing, and management requests assistance from you in determining an economical sales and production mix for the coming year. The company has provided the following data:

Mcgraw Hill Problem Solution Governmental Accounting:

Imposing Duties Malcolm K. Sparrow, 1994-02-07 Policing environmental protection and tax administration have much more in common than practitioners in these areas often recognize Their cultures and traditions have for the past few decades incorporated a classic enforcement mentality based on the underlying assumption that a ruthless and efficient investigative and enforcement capability would produce compliance through the mechanisms of deterrence In these fields and perhaps in many other enforcement or compliance oriented professions Sparrow believes the traditional enforcement approach is under stress There are too many violators too many laws to be enforced and not enough resources to get the job done In this book Sparrow draws out remarkable parallels in the ways these professions are adapting to meet their current challenges as they reject their traditional reliance on retrospective case by case after the fact enforcement Rather than perpetuating their dependence on processes procedures and coverage these professions are each developing new capacities for analyzing important patterns of noncompliance prioritizing risks and designing intelligent interventions using a much broader range of tools Sparrow extracts the essence of the transformations underway explores the critical implications for information management and lays out the issues that need resolution before the emerging compliance strategies can reach maturity This book is required reading for all those concerned with either the theory or the practice of the compliance side of government
