experiment as expression and as a visual language with exemplary curricula for pre K12 art and general education pre professional programs across the visual arts and continuing education With the aid of instructional examples this volume dispels the misconception of drawing as a talent reserved for the artistically gifted and posits it as a teachable skill that can be learned by all This text will be of primary interest to researchers scholars and doctoral students with interests in drawing theory and practice cognition in the arts positive psychology creativity theory as well as the philosophy and history of arts education Aligning with contemporary trends such as Design Thinking STEAM and Graphicacy the text will also have appeal to visual arts educators at all levels and other educators involved in arts integration
