Studies in Intelligence, 2016 *Drawing Futures* Bob Sheil, Frédéric Migayrou, Luke Pearson, Laura Allen, 2016-11-11

Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture. Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. *Drawing Futures* will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie. *Drawing Futures* focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name taking place at The Bartlett School of Architecture UCL in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

An Age of Accountability John L. Rury, 2023-10-13 An Age of Accountability highlights the role of test based accountability as a policy framework in American education from 1970 to 2020 For more than half a century the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment The theory of change embedded in almost all test based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps which repeatedly failed to materialize But even after very clear disappointments no other policy framework has emerged to challenge its hegemony The American public today has little confidence in institutions to improve the quality of goods and services they provide especially in the public sector As a consequence many Americans continue to believe that accountability remains a vital necessity even if educators and policy scholars disagree

School World Order John Adam Klyczek, 2019-10-11 For more than twenty years Charlotte Thomson Iserbyt has been warning the American people of the New World Order stratagem to overthrow democratically elected school boards with public private partnerships between the federal government and globalist corporations In this volume John Klyczek expounds on Iserbyt's theories by tracing her work to the present moment as a last ditch effort to stop the corporatization of education Klyczek explores how the infamous Yale Secret Society Skull and Bones utilized Robber Baron philanthropy and stimulus response psychological conditioning to institute a corporatist system of workforce training for a fascistically planned economy He then explains how this system is being upgraded to a technocratic education system of corporatist school choice through virtual education technologies that program students for a globally planned economy School World Order will teach you the ulterior agenda behind the ed tech movement data mining students for research and development into artificial intelligence and transhumanist biotechnologies for the establishment of an authoritarian post human society
