Mathematics Literacy Paper 23:

Proceedings of the 13th International Congress on Mathematical Education Gabriele Kaiser, 2017-10-31 This book is open access under a CC BY 4.0 license. The book presents the Proceedings of the 13th International Congress on Mathematical Education ICME 13 and is based on the presentations given at the 13th International Congress on Mathematical Education ICME 13. ICME 13 took place from 24th to 31st July 2016 at the University of Hamburg in Hamburg, Germany. The congress was hosted by the Society of Didactics of Mathematics Gesellschaft für Didaktik der Mathematik GDM and took place under the auspices of the International Commission on Mathematical Instruction ICMI. ICME 13 brought together about 3,500 mathematics educators from 105 countries; additionally, 250 teachers from German-speaking countries met for specific activities. Directly before the congress activities were offered for 450 Early Career Researchers. The proceedings give a comprehensive overview on the current state of the art of the discussions on mathematics education and display the breadth and deepness of current research on mathematical teaching and learning processes. The book introduces the major activities of ICME 13, namely articles from the four plenary lecturers and two plenary panels, articles from the five ICMI awardees, reports from six national presentations, three reports from the thematic afternoon devoted to specific features of ICME 13. Furthermore, the proceedings contain descriptions of the 54 Topic Study Groups which formed the heart of the congress and reports from 29 Discussion Groups and 31 Workshops. The additional important activities of ICME 13, namely papers from the invited lecturers, will be presented in the second volume of the proceedings. **Official Gazette of the United States**

Patent and Trademark Office, 2003 Reading and Writing the World with Mathematics Eric Gutstein, 2012-09-10 Mathematics education in the United States can reproduce social inequalities: whether schools use either basic skills curricula to prepare mainly low-income students of color for low-skilled service jobs or standards-based curricula to ready students for knowledge-intensive positions. And working for fundamental social change and rectifying injustice are rarely included in any mathematics curriculum. Reading and Writing the World with Mathematics argues that mathematics education should prepare students to investigate and critique injustice and to challenge in words and actions oppressive structures and acts. Based on teacher research, the book provides a theoretical framework and practical examples for how mathematics educators can connect schooling to a larger sociopolitical context and concretely teach mathematics for social justice.
