## Mathematics Paper 1 September 2013 Memorandum:

**Studies in Intelligence**, 2016      **Show Me the Evidence** Ron Haskins, Greg Margolis, 2014-12-01 The first comprehensive history of the Obama administration's evidence based initiatives From its earliest days the Obama administration planned and enacted several initiatives to fund social programs based on rigorous evidence of success Ron Haskins and Greg Margolis tell the story of six spanning preschool and K 12 education teen pregnancy employment and training health and community based programs Readers will appreciate the fast moving descriptions of the politics and policy debates that shaped these federal programs and the analysis of whether they will truly reshape federal social policy and greatly improve its impacts on the nation's social problems Based on interviews with 134 individuals including advocates officials at the Office of Management and Budget and the Domestic Policy Council Congressional staff and officials in the federal agencies administering the initiatives as well as Congressional and administration documents and news accounts the authors examine each of the six initiatives in separate chapters The story of each initiative includes a review of the social problem the initiative addresses the genesis and enactment of the legislation that authorized the initiative and the development of the procedures used by the administration to set the evidence standard and evaluation requirements including the requirements for grant applications and awarding of grants      *Hitting Probabilities for Nonlinear Systems of Stochastic Waves* Robert C. Dalang, Marta Sanz-Solé, 2015-08-21 The authors consider a  $d$  dimensional random field  $u(x)$  that solves a non linear system of stochastic wave equations in spatial dimensions  $k = 1, 2, 3$  driven by a spatially homogeneous Gaussian noise that is white in time They mainly consider the case where the spatial covariance is given by a Riesz kernel with exponent  $\alpha$  Using Malliavin calculus they establish upper and lower bounds on the probabilities that the random field visits a deterministic subset of  $\mathbb{R}^d$  in terms respectively of Hausdorff measure and Newtonian capacity of this set The dimension that appears in the Hausdorff measure is close to optimal and shows that when  $d \geq 2k + 1$  points are polar for  $u$  Conversely in low dimensions  $d$  points are not polar There is however an interval in which the question of polarity of points remains open      **Drawing Futures** Bob Sheil, Frédéric Migayrou, Luke Pearson, Laura Allen, 2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture Despite numerous developments in technological manufacture and computational design that provide new grounds for designers the act of drawing still plays a central role as a vehicle for speculation There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation Drawing Futures will present a compendium of projects writings and interviews that critically reassess the act of drawing and where its future may lie Drawing Futures focuses on the discussion of how the field of drawing may expand

synchronously alongside technological and computational developments The book coincides with an international conference of the same name taking place at The Bartlett School of Architecture UCL in November 2016 Bringing together practitioners from many creative fields the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas

Minimum Deterrence: Examining the Evidence Keith B. Payne, James Schlesinger, 2016-04-14 The National Institute for Public Policy's new book *Minimum Deterrence Examining the Evidence* is the first of its kind Dr Keith Payne former Secretary of Defense James Schlesinger and an unparalleled bipartisan group of senior civilian and military experts critically examine eight basic assumptions of Minimum Deterrence against available evidence In general Minimum Deterrence does not fare well under the careful scrutiny Proponents of a Minimum Deterrent US nuclear force posture believe that anywhere from a handful to a few hundred nuclear weapons are adequate to deter reliably and predictably any enemy from attacking the United States now and in the future Because nuclear weapons are so destructive their thinking goes no foreign leader would dare challenge US capabilities The benefits advocates claim of reducing US nuclear weapons to the minimum level needed are better relations with Russia and China reinforcement of the arms control and Nonproliferation Treaty billions of defense dollars in savings and greater international stability on the way to nuclear zero As political pressure builds to pursue this vision of minimum US deterrence *Minimum Deterrence Examining the Evidence* stands as the seminal study to address the many claims of great benefit using available evidence This book was published as a special issue of *Comparative Strategy*

Energy Security and Sustainable Economic Growth in China S. Yao, 2014-07-29 This book focuses on various issues of energy energy efficiency and environmental policy in China It discusses different aspects on how China may maintain its fast economic growth through good management of energy consumption and development of various energy sources
