Cultural Knowledge - A Critical Perspective on the Concept as a Foundation for Respect for Cultural Differences Katharina Pilhofer,2011-07 This book engages in a critical reading of cultural knowledge By cultural knowledge I refer to cultural dimensions as introduced by Geert Hofstede Edward T Hall and Fons Trompenaars Their research has manifold been taught to individuals who will face an intercultural setting in their business career at some point in the future It aims to create understanding for cultural differences in order to decrease emotional discomfort and enhance business success of those who acquire the knowledge At the same time it claims to present a foundation for respect for cultural differences since it gives an imaginative room to them If one studies the knowledge s he will be aware of cultural differences and therefore treat them with respect The book is composed of two perspectives on cultural knowledge In a first step the book turns to post colonial theory Post colonialism argues how a Western perspective has framed cultural identities and how these representations are flawed by colonial thinking In a second step a Levinasian perspective is taken on cultural knowledge The French philosopher Emmanuel Levinas was deeply concerned with our way of approaching the Other He understood the Other to be incomprehensible to our understanding The Other s otherness cannot be grasped by framing her him into categories He argued that every encounter is of ethical nature and encouraged each individual to show infinite responsibility responsebility towards the Other that is not confined by any pre knowledge The book concludes that cultural

knowledge has been exposed to significant limitations These limitations are mainly a product of control interests Individuals who acquire cultural knowledge and are not made aware of its limitations face consequences that may compromise their respect for cultural differences Even though cultural knowledge presents itself as foundation for respect it prioritizes understanding for the sake of control As a consequence respectful representations are not given and respect for cultural differences is only supported as long as it does not threaten control Ultimately this book shall present a plea for trainers and teachers of cultural knowledge to become acquainted with the limitations reflect on them and forward this knowledge to their students It shall also encourage researchers of cultural differences and other scholars to reflect and perhaps improve on it
