

GOALS FOR LIFE

WHAT ARE THEY?

Goals for life refer to specific, meaningful objectives that individuals set for themselves to achieve and fulfill over the course of their lifetime. These goals are intended to provide direction, motivation, and a sense of purpose, guiding individuals in their pursuit of personal growth, success, and fulfillment.

EXAMPLES

Short-Term - These can be achieved in less than 3 months and should support your longer-term goals, e.g. "exercise 30 minutes a day".

Long-Term - These are the future goals you want from your life and will take 5 to 25 years, e.g. "live healthily into my 70s."

Logical Argument in the Research Paper Russ Ward, 1997 Logical Argument in the Research Paper operates on the premise that collegiate level writing when cast in its most significant and sophisticated form is argumentative. Students are shown how writers examine a potential topic, establish a stance upon that topic, defend the stance, avoid reasoning and ethical errors and in general say something meaningful about the topic. It also includes instruction about finding sources, gathering information from them and correctly documenting them. However, the emphasis remains on how effective writers evaluate sources, think about the information they discover, prepare a fair and informed argument, rethink and revise the argument and finally present an argument in its completed form. Logical Argument in the Research Paper will help students learn some of the reasoning processes that all writers use when composing the academic argument.
