

# A Living Systematic Review of Problems with Systematic Reviews

We expect best practice from clinical trials, but what's the integrity of the systematic reviews that combine them?

## METHODS

Comprehensive searches for literature highlighting flaws in published systematic reviews

Qualitative analysis of the underlying problems

Dissemination and elaboration via a dedicated website with infrastructure to incorporate the emerging evidence base

Problem focussed- not people. The aim is to uphold systematic review practice, but also to scrutinise it

Open to feedback and engagement from the research community and beyond

## RESULTS

485 included articles from the first iteration (searches conducted 2022)

67 discrete problems identified across 4 domains that are key to systematic reviews:

COMPREHENSIVE

RIGOROUS

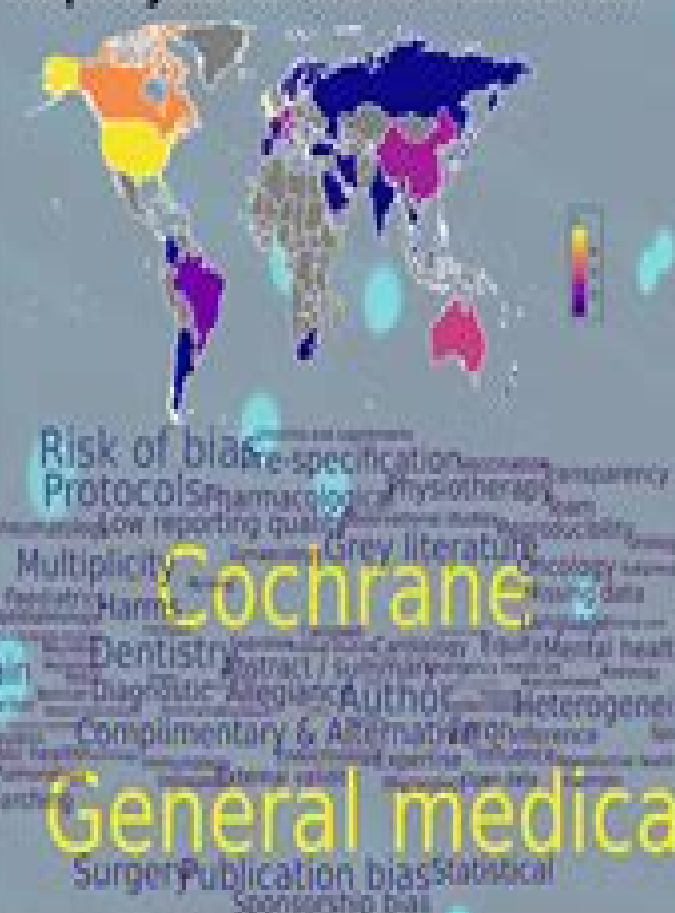

TRANSPARENT

OBJECTIVE

Not all 67 problems are covered by existing systematic review guidelines and methods

This living research aims to be a learning resource to improve the reliability and validity of future systematic reviews
