s organizational structure from the end of the Northern Expedition to the conclusion of World War II Included are tables of organization and strength reports for the wartime period The armament section illustrates and details not only the characteristics of the many and varied weapons used in China many seen nowhere else but also their acquisition and such local production as was undertaken This is complemented by a chapter on the arsenals and their evolution and production programs The Chinese army was one of the largest of the war and it and Japan s fought longer than any other It faced unique challenges including fragmented loyalties huge expanses of territory poor logistics networks inadequate arms supplies and often incompetence and corruption Nevertheless they fought bravely in major battles through 1941 and were able to counterpunch effectively in important regions through the rest of the war Aimed at both military historians and wargamers this work fills an important gap in our understanding of this the most under appreciated army of the war
