Capturing Social and Behavioral Domains and Measures in Electronic Health Records Institute of Medicine, Board on Population Health and Public Health Practice, Committee on the Recommended Social and Behavioral Domains and Measures for Electronic Health Records, 2015-01-08 Determinants of health like physical activity levels and living conditions have traditionally been the concern of public health and have not been linked closely to clinical practice. However, if standardized social and behavioral data can be incorporated into patient electronic health records (EHRs), those data can provide crucial information about factors that influence health and the effectiveness of treatment. Such information is useful for diagnosis, treatment choices, policy, health care system design, and innovations to improve health outcomes and reduce health care costs.

Capturing Social and Behavioral Domains and Measures in Electronic Health Records Phase 2 identifies domains and measures that capture the social determinants of health to inform the development of recommendations for the meaningful use of EHRs. This report is the second part of a two-part study. The Phase 1 report identified 17 domains for inclusion in EHRs. This report pinpoints 12 measures related to 11 of the initial domains and considers the implications of incorporating them into all EHRs. This book includes three chapters from the Phase 1 report in addition to the new Phase 2 material. Standardized use of EHRs that include social and behavioral domains could provide better patient care, improve population health, and enable more informative research. The recommendations of **Capturing Social and Behavioral Domains and Measures in Electronic Health Records Phase 2** will provide valuable information on which to base problem identification, clinical diagnoses, patient treatment outcomes assessment, and population health measurement.

From Predator to Prey Letlhokwa George Mpedi, 2025-10-31 In the stillness of the African bush leadership reveals itself in its most primal form Here where the survival of each species depends on discipline instinct coordination and trust its lessons arise from the most unexpected sources For Letlhokwa George Mpedi a journey through South Africa's Kruger National Park transformed from merely a game drive to a masterclass in leadership Observing the intricate dynamics of animal behaviour Letlhokwa began to trace compelling parallels between the natural order and human systems of power Through this lens this book explores how nature's codes can inform leadership dynamics Drawing from a distinctly African approach to leadership which emphasises community and interdependence *From Predator to Prey* explores the unwritten rule of law that governs the wild and its applications for humanity From the silent cooperation of lionesses on a hunt to the matriarchal approach of elephants and even the territorial instincts of wild dogs this book offers a vivid and thought provoking perspective on how nature's instincts can inform our understanding of leadership dynamics As Letlhokwa tracks and interprets the behaviours and strategies of various species he challenges conventional ideas of leadership based solely on top down control Through this observation he invites a critical rethinking of conventional leadership paradigms In place of rigid hierarchies he presents a model that values the very tenets of ubuntu leadership as he
