

## Birth

Whales' experiences start with birth, where calves are born with the help of midwives in some species.

## Infancy

The infancy stage is characterized by rapid growth and soon the mother's milk.

## Juvenile

During the juvenile phase, whales learn essential survival skills such as hunting and social interactions.

## Maturity

Maturity is reached when whales can reproduce, marking their entry into adulthood.

## Breeding

The breeding stage involves complex mating rituals, with some species forming lifelong bonds or seasonal partnerships.

What Do You Know About Life Cycles? Anna Claybourne, 2017-12-15 Every living thing goes through a life cycle but each species has its own unique steps in the circle of life This interactive book gives readers a hands on learning experience through engaging experiments They ll learn about life cycles and develop essential Next Generation Science Standards skills such as asking testable questions as they complete each project The scientific method is made easy and accessible as readers complete a succession of boxes that prompt them to Ask Test Observe and Measure Helpful hints and materials lists ensure readers will complete projects with ease Fun photographs fast fact boxes and What s Next sections keep readers immersed in the flow of knowledge Demographic Methods across the Tree of Life Roberto Salguero-Gomez, Marlène

Gamelon, 2021-08-31 Demography is everywhere in our lives from birth to death Indeed the universal currencies of survival development reproduction and recruitment shape the performance of all species from microbes to humans The number of techniques for demographic data acquisition and analyses across the entire tree of life microbes fungi plants and animals has drastically increased in recent decades These developments have been partially facilitated by the advent of technologies such as GIS and drones as well as analytical methods including Bayesian statistics and high throughput molecular analyses However despite the universality of demography and the significant research potential that could emerge from unifying i questions across taxa ii data collection protocols and iii analytical tools demographic methods to date have remained taxonomically siloed and methodologically disintegrated This is the first book to attempt a truly unified approach to demography and population ecology in order to address a wide range of questions in ecology evolution and conservation biology across the entire spectrum of life This novel book provides the reader with the fundamentals of data collection model construction analyses and interpretation across a wide repertoire of demographic techniques and protocols It introduces the novice demographer to a broad range of demographic methods including abundance based models life tables matrix population models integral projection models integrated population models individual based models and more Through the careful integration of data collection methods analytical approaches and applications clearly guided throughout with fully reproducible R scripts the book provides an up to date and authoritative overview of the most popular and effective demographic tools Demographic Methods across the Tree of Life is aimed at graduate students and professional researchers in the fields of demography ecology animal behaviour genetics evolutionary biology mathematical biology and wildlife management **Applied Mathematical Demography** Nathan Keyfitz, Hal Caswell, 2005-11-14 Focuses on applications of

demographic models This book introduces the life table to describe age specific mortality and uses it to develop theory for stable populations and the rate of population increase This theory is then revisited in the context of matrix models for stage classified as well as age classified populations Dolphins Peter Evans, 1994 Angling from the Fishes' Point of View Barry Atkinson, 1961 Matrix Population Models Hal Caswell, 2001 DEVELOPING MATRICES AND USING DATA
