

After birth harp seals start their life as **Yellow Jackets**

A few days after birth their coats become white at this stage they are known as **White Coats**

After two weeks of life pups now start to moult in small patches, revealing a silvery-grey coat dotted with blackish spots. At this stage harp seals are known as **Ragged Jackets**

This stage is called **Beater**. This stage happened about 18 days after Ragged Jacket.

This stage is called **bedlamer** this stage is them turning into a teen.

The final stage is **Adult**. This stage happens approximately 18 days after Bedlamer.

Climate Change Impacts on Fisheries and Aquaculture Bruce F. Phillips, Mónica Pérez-Ramírez, 2017-09-18 The first comprehensive review of the current and future effects of climate change on the world's fisheries and aquaculture operations. The first book of its kind *Climate Change Impacts on Fisheries and Aquaculture* explores the impacts of climate change on global fisheries resources and on marine aquaculture. It also offers expert suggestions on possible adaptations to reduce those impacts. The world's climate is changing more rapidly than scientists had envisioned just a few years ago and the potential impact of climate change on world food production is quite alarming. Nowhere is the sense of alarm more keenly felt than among those who study the warming of the world's oceans. Evidence of the dire effects of climate change on fisheries and fish farming has now mounted to such an extent that the need for a book such as this has become urgent. A landmark publication devoted exclusively to how climate change is affecting and is likely to affect commercially vital fisheries and aquaculture operations globally. *Climate Change Impacts on Fisheries and Aquaculture* provides scientists and fishery managers with a summary of and reference point for information on the subject which has been gathered thus far. Covers an array of critical topics and assesses reviews of climate change impacts on fisheries and aquaculture from many countries including Japan, Mexico, South Africa, Australia, Chile, US, UK, New Zealand, Pacific Islands, India and others. Features chapters on the effects of climate change on pelagic species, cod, lobsters, plankton, macroalgae, seagrasses and coral reefs. Reviews the spread of diseases, economic and social impacts, marine aquaculture and adaptation in aquaculture under climate change. Includes special reports on the Antarctic Ocean, the Caribbean Sea, the Arctic Ocean and the Mediterranean Sea. Extensive references throughout the book make this volume both a comprehensive text for general study and a reference guide to further research for fisheries scientists, fisheries managers, aquaculture personnel, climate change specialists, aquatic invertebrate and vertebrate biologists, physiologists, marine biologists, economists, environmentalist biologists and planners.

Managing the Antarctic Environment Kenneth Charles Jezek, Lynn Tipton-Everett, 1995 **The World Book Encyclopedia**, 1996 *Marine Wildlife* University of Sydney. Post-Graduate Foundation in Veterinary Science, 2000

Weddell Seals Jeremy Schmidt, 2023-10-06 For more than 50 years the Weddell Seal Science project has been studying the world's southernmost breeding mammal in its farthest south location, McMurdo Sound on the ice-bound edge of Antarctica. This book explores the life history of Weddell seals, surprisingly approachable, big-eyed, smiling-faced creatures and details the science of studying them, the techniques, the motivations, the objectives and the results. Although science is at the heart of the book, this is also an adventure story about scientists living in a remote field camp far out on the sea ice surrounded by glaciers where you can feel the ocean pulsing beneath your feet. Seals are all around, penguins walk through camp, the weather can be exquisitely beautiful or too severe to step outside. Simply being there would be a wonderful experience on its own, but in this case the objective is science, a deeper understanding of our endlessly fascinating planet.
