L'entreprise Dans La Mondialisation Contexte Et Dynamiques D'investissement Et D'innovation:

L'entreprise dans la mondialisation : contexte et dynamiques d'investissement et d'innovation Dimitri Uzunidis, Blandine Laperche, Sophie Boutillier, 2011-01-19 La mondialisation n'est pas un phénomène nouveau. L'histoire nous enseigne que le commerce a depuis longtemps unifié le monde. Mais au fil du développement des affaires, les entreprises se sont construites à partir des investissements transfrontaliers et dans un but d'innover continuellement. Les grandes entreprises nient les frontières tout en tirant profit des particularismes nationaux pour mieux asseoir leur pouvoir de contrôle des marchés mondiaux. Comment comprendre la mondialisation ? De quelle manière la mondialisation est-elle intimement liée aux stratégies globales des firmes et comment ces stratégies globales sont-elles le résultat de la mondialisation ? Face aux contraintes de la mondialisation des marchés et de la concurrence que font les entreprises pour survivre ou se développer ? Les auteurs de ce livre analysent la mondialisation et les stratégies des firmes dans un contexte hautement concurrentiel soumis aux impératifs de la finance et du profit immédiat.

Innovation in Developing and Transition Countries Alexandra Tsvetkova, Jana Schmutzler, Marcela Suarez, Alessandra Faggian, 2017-09-29 This edited volume offers a multidisciplinary perspective on innovation challenges and innovative practices in the context of developing and transition countries. The contributions mostly embrace a national innovation system approach in an attempt to understand innovation processes and their implications at both macro and micro levels.

Process Engineering Renewal 3 Éric Schaer, Jean-Claude André, 2020-07-17 Process engineering emerged at the beginning of the 20th Century and has become an essential scientific discipline for the matter and energy processing industries. Its success is incontrovertible with the exponential increase in techniques and innovations. Rapid advances in new technologies such as artificial intelligence as well as current societal needs, sustainable development, climate change, renewable energy, the environment are developments that must be taken into account in industrial renewal. Process Engineering Renewal 3 presents a prospective analysis that demonstrates the significant disruptions linked to sustainable development, global warming, etc. These constraints may trigger changes in the social regulation system which in turn applies pressure on actors of process engineering to evolve and adapt to these developments.

Un renouveau du génie des procédés 3 Éric Schaer, Jean-Claude André, 2019-11-01 Apparu au début du siècle précédent, le génie des procédés est devenu une discipline scientifique incontournable pour les industries de transformation de la matière et de l'énergie. Son succès ne se dément pas avec l'augmentation exponentielle des techniques et des innovations. Le développement rapide de nouvelles technologies comme l'intelligence artificielle ou de nouveaux besoins sociétaux, développement durable, réchauffement climatique, énergies renouvelables, environnement, etc. implique des évolutions qui doivent être prises en considération dans le renouveau industriel. L'analyse prospective réalisée et présentée dans ce troisième volume met en évidence des perturbations notables liées au développement durable, au réchauffement climatique, etc. Ces contraintes peuvent même induire des changements du système de régulation sociale, ce qui impose des évolutions majeures.
