The Changing Faces of Glutathione, a Cellular Protagonist Alfonso Pompella,Alessandro Corti,2015-07-17

Glutathione GSH has been described for a long time just as a defensive reagent against the action of toxic xenobiotics drugs pollutants carcinogens both directly and as a cofactor for GSH transferases As a prototype antioxidant it has been involved in cell protection from the noxious effect of excess oxidant stress both directly and as a cofactor of glutathione peroxidases In addition it has long been known that GSH is capable of forming disulfide bonds with cysteine residues of proteins and the relevance of this mechanism S glutathionylation in regulation of protein function has been well documented in a number of research fields Rather paradoxically it has also been highlighted that GSH and notably its catabolites as originated by metabolism by gamma glutamyltransferase can promote oxidative processes by participating in metal ion mediated reactions eventually leading to formation of reactive oxygen species and free radicals Also a fundamental role of GSH has been recognized in the storage and transport of nitric oxide NO in the form of S nitrosoglutathione GSNO The significance of GSH as a major factor in regulation of cell life proliferation and death can be regarded as the integrated result of all these roles as well as of more which are emerging in diverse fields of biology and pathophysiology Against this background modulation of GSH levels and GSH related enzyme activities represents a fertile field for experimental pharmacology in numerous and diverse perspectives of animal plant and microbiologic research This research topic includes 14 articles i e 4 Opinion Articles 6 Reviews and 4 Original Research Articles The contributions by several distinguished research groups each from his own standpoint of competence and expertise provide a comprehensive and updated view over the diverse roles the changing faces of GSH and GSH related enzymes in cell's health disease and death

This thoroughly revised third edition of Teaching Psychology synthesizes the latest

pedagogical research on effective teaching and translates it into recommendations for classroom application. It also takes into account the many changes in the teaching landscape that have taken place in recent years. Covering key topics such as planning a course, choosing teaching methods, assimilating technology, and the integration of teaching into the rest of your academic life, this book also includes an abundance of supportive supplementary content to guide and inform new teachers. This content will also benefit seasoned teachers who wish to reevaluate their current teaching practices and explore new teaching ideas and techniques. Presenting a comprehensive and cutting edge teaching guide for psychology teachers, this book is a vital resource for those who are training psychology instructors or undertaking a teaching psychology course. It is also a useful text for more experienced faculty looking to update their current teaching practices.

Plants as Bioreactors for Industrial Molecules Santosh Kumar Upadhyay, Sudhir Pratap Singh, 2023-02-06 PLANTS AS BIOREACTORS FOR INDUSTRIAL MOLECULES An incisive and practical discussion of how to use plants as bioreactors. In *Plants as Bioreactors for Industrial Molecules*, a team of distinguished researchers delivers an insightful and global perspective on the use of plants as bioreactors. In the book, you will find coverage of the basic applied biosynthetic and translational approaches to the exploitation of plant technology in the production of high value biomolecules. The authors focus on the yield and quality of amino acids, vitamins, and carbohydrates. The authors explain how high value biomolecules enable developers to create cost effective biological systems for the production of biomolecules useful in a variety of sectors. They provide a holistic approach to plant based biological devices to produce natural molecules of relevance to the health and agriculture industries. Readers will also find a thorough overview of plants as bioreactors and discussions of molecular farming for the production of pharmaceutical proteins in plants. Comprehensive explorations of plants as edible vaccines and plant cell culture for biopharmaceuticals. Practical discussions of the production of attenuated viral particles as vaccines in plants and insecticidal protein production in transgenic plants. Extensive treatment of the regulatory challenges involved in using plants as bioreactors. Perfect for academics, scientists, and researchers in industrial microbiology and biotechnology. *Plants as Bioreactors for Industrial Molecules* will also earn a place in the libraries of biotechnology company professionals in applied product development.
