La Grande Transition La France Dans Le Monde Qui Vient:

La grande transition Pierre Veltz, 2008 La France est engagée dans une transition économique sociale et culturelle sans équivalent depuis un demi-siècle L'économie des services le passage à l'hyperindustrielle la concurrence des pays émergents les nouvelles mobilités l'individualisation des modes de vie la reconversion environnementale la montée des cosystèmes complexes que sont les grandes métropoles et la ruralisation de nos campagnes ont déjà commencé à modifier en profondeur la géographie comme la société de ce pays Pour comprendre les mécanismes intimes de ces bouleversements comme pour en relever les défis il faut partir de la diversité des territoires Telle est la conviction de Pierre Veltz qui livre ici une remarquable synthèse sur les transformations en cours la croisée de l'économie de la sociologie de la science politique et de la géographie Ce faisant il dévoile quelques uns des traits dominants du monde qui vient et de la place que pourrait y occuper la France pour peu qu'elle accepte d'entrer dans une nouvelle révolution intellectuelle

The Americanization of France Barnett

Singer, 2013-04-18 This engaging knowledgeable book traces the American path France has followed since resolving its searing Algerian conflict in 1962 Barnett Singer convincingly demolishes two pervasive clichés about modern France first that the country never has been fit to fight wars including wars on terror and second that the French have always been and remain overwhelmingly anti American Drawing on a wealth of archival sources Barnett Singer clearly demonstrates that a serious and organized France fought strongly until its own divisions international pressures and the actions of de Gaulle ended the conflict with tragic consequences The outcome led to an important sea change clearing the way for France to embrace American culture especially rock n roll and more generally an American style emphasis on personal happiness The author argues that today's France wounded by the loss of traditions and stability is increasingly pro American clinging to trends from across the Atlantic as to a lifeline

Strategic Intelligence for the Future 1 Henri Dou, Alain Juillet, Philippe

Clerc, 2019-04-10 Information in all its forms is at the heart of the economic intelligence process It is also a powerful vector of innovation and more than ever a balance between economic and societal forces Strategic Intelligence for the Future 1 analyzes the need for the French economic intelligence to mutate in order to develop the economy strengthen social cohesion and protect vital interests This mutation requires a change of attitudes and a new way of thinking widely open to global change and new technologies The focus of the French economic intelligence on conventional objectives such as business and the economy does not allow for the integration of its multiple possible fields and thus its global nature The strategy foresight and temporal dynamics necessary to the understanding of the world and the new balance of power and control of complex situations have thus increased the time needed to put this in place Both theoretical and practical this book provides a basis from which to develop enhanced economic intelligence leading to the implementation of global security
