

How To Teach 5 Step Inquiry Method

Step One: Pose a Question

Think: What do I want to know about animals? What question would I like to research?

Step Two: Conduct Research

Think: What sources will I use to find the information for my question? How many sources do I need?

Step Three: Present Information

Think: What have I learned from my research? What conclusions can I make from what I have learned?

Step Four: Share Learning

Think: How can I present the information I have learned about animals? What is the best way to share the information?

Step Five: Assess Inquiry Process

Think: How did I do at each inquiry process? What did I learn? Could I have done differently?

Science Inquiry, Argument and Language Brian M. Hand, 2008 Science Inquiry Argument and Language describes research that has focused on addressing the issue of embedding language practices within science inquiry through the use of the Science Writing Heuristic approach In recent years much attention has been given to two areas of science education scientific argumentation and science literacy The research into scientific argument have adopted different orientations with some focusing on science argument as separate to normal teaching practices that is teaching students about science argument prior to using it in the classroom context while others have focused on embedding science argument as a critical component of the inquiry process The current emphasis on science literacy has emerged because of greater understanding of the role of language in doing and reporting on science Science is not viewed as being separate from language and thus there

is emerging research emphasis on how best to improving science teaching and learning through a language perspective Again the research orientations are parallel to the research on scientific argumentation in that the focus is generally between instruction separate to practice as opposed to embedding language practices within the science classroom context
