Internet of Things and the Law Legal Strategies for Consumer Centric Smart Technologies is the most comprehensive and up-to-date analysis of the legal issues in the Internet of Things (IoT). For decades, the decreasing importance of tangible wealth and power and the increasing significance of their disembodied counterparts has been the subject of much legal research. For some time now, legal scholars have grappled with how laws drafted for tangible property and predigital offline technologies can cope with dematerialisation, digitalisation, and the internet. As dematerialisation continues, this book aims to illuminate the opposite movement, rematerialisation, namely the return of data, knowledge, and power within a physical smart world. This development frames the book's central question: can the law steer rematerialisation in a human-centric and socially just direction? To answer it, the book focuses on the IoT, the sociotechnological phenomenon that is primarily responsible for this shift. After a thorough analysis of how existing laws can be interpreted to empower IoT end users, Noto La Diega leaves us with the fundamental question of what happens when the law fails us and concludes with a call for collective resistance against smart capitalism. The Moral Case for Profit Maximization argues that profit maximization is moral when businessmen seek to maximize profit by creating goods or services that are of objective value. Traditionally, profit maximization has been defended on economic grounds. Profit economists argue that it incentivizes businessmen to produce goods and services. In this view, businessmen do not need to be virtuous as long as they deliver the goods. It challenges the traditional defense of profit maximization, arguing that profit maximization is morally ambitious because it requires businessmen to form normative abstractions and to cultivate a virtuous character. In so doing, the author also challenges the moral basis of corporate social responsibility. Proponents of CSR argue that businessmen can do good while doing well. This book argues that businessmen already do good by maximizing profit, drawing upon the histories of the wheel, the refrigerator, and the shipping container, as well as the biographies of J. P. Morgan, John D. Rockefeller, and Thomas Edison, to demonstrate the role of values in the creation of material goods and the role of the virtues in value creation. The author challenges readers to rethink the relationship between profit, value, and virtue. **FBA Amazon Selling Private Label : How To Make Money With Amazon FBA**
