- 1 Attraction is one of the primal emotions that has helped humanity survive and reproduce It is triggered in our bodies in the same way as other primal emotions such as hunger fatigue and fear We feel it in specific circumstances and we are powerless to convince ourselves not to feel it
- 2 The two major forces that shape males and females differently are nature and nurture Nature is the obvious biological difference between the sexes and nurture is the more elusive difference in socialization that starts to affect us from the moment we leave the womb
