

"You asked for this, you deserve. I'll kill you. Your tricks won't help you. I carry a turtle stone."

Cersei smiled. The reputation of turtle stone was as mistaken as it was popular. But the witcher was not going to lose his earnings on spells much less expose his stone used to contact with Cersei's Maids. He dove under the whirling Maids and, with the heel of his hand and his silver stabbed out, hit him in the temple.

VI

Cersei quickly regained consciousness and looked around in the total darkness. He noticed that he was tied up. He did not see Cersei standing right beside him. But he realised where he was and let out a pained, seething howl.

"Keep quiet," said the witcher. "Otherwise you'll lose her ear before her time."

Crash Course in Gaming Suellen S. Adams, 2013-11-25 Video games aren't just for kids anymore. This book will describe the why and how to start or expand a video gaming program in the library including some specific examples of how to target adult and female gamer patrons. Gaming supplies more than just visual stimulation and empty entertainment; it can also promote socialization as well as the learning of both traditional and new literacies required to succeed in the modern world. Problem solving, multi-tasking, complex decision making on the fly, and reading the combination of words and graphics are vital skills for the 21st century, all of which are required to play video games. Crash Course in Gaming discusses the pros and cons of gaming, the types of games and game systems, circulating collections, and game programs. It explains how a library's video game program can and should do much more than simply draw younger users to the library, providing examples of how everyone from parents to senior citizens can benefit from a patron-oriented computer gaming program. The appendices also include specific games programs, review sources, and sources for further information.

Sense and Respond Jeff Gothelf, Josh Seiden, 2017-02-07 The End of Assembly Line Management. We're in the midst of a revolution. Quantum leaps in technology are enabling organizations to observe and measure people's behavior in real time, communicate internally at extraordinary speed, and innovate continuously. These new software-driven technologies are transforming the way companies interact with their customers, employees, and other stakeholders. This is no mere tech issue. The transformation requires a complete rethinking of the way we organize and manage work. And as software becomes ever more integrated into every product and service, making this big shift is quickly becoming the key operational challenge for businesses of all kinds. We need a management model that doesn't merely account for but actually embraces continuous change. Yet the truth is, most organizations continue to rely on outmoded industrial era operational models. They structure their teams, manage their people, and evolve their organizational cultures the way they always have. Now organizations are emerging and thriving based on their capacity to sense and respond instantly to customer and employee behaviors. In Sense and Respond, Jeff Gothelf and Josh Seiden, leading tech experts and founders of the global Lean UX movement, vividly show how these companies operate, highlighting the new mindset and skills needed to lead and manage them and to continuously innovate within them. In illuminating and instructive business examples, you'll see organizations with distinctively new operating principles shifting from managing outputs to what the authors call outcome-focused management, forming self-guided teams that can read and react to a fast-changing environment, creating a learning all the time culture that can understand and respond to new customer behaviors and the data they generate, and finally developing in everyone at the company the new universal skills of customer listening, assessment, and response. This engaging and practical book provides the crucial new operational and management model to help you and your organization
