Private irrigation in Sub-Saharan Africa: regional Seminar on Private Sector Participation and Irrigation Expansion in Sub-Saharan Africa, Accra, Ghana, 22-26 October 2001 Hilmy Sally, Charles L. Abernethy, 2011-10-21
Only 4 percent of arable land in sub Saharan Africa is irrigated using just 2 percent of the available water resources
Furthermore 18 percent of the area equipped for irrigation is not utilized at all and the intensity of use varies between 50 percent and 80 percent This highlights the huge potential available for intensifying and expanding irrigated area provided that the investments required can be successfully mobilized However it must be noted that if investments in irrigation are to yield satisfactory returns investments must also be made in a series of related activities Current global figures for the amount of private investment in irrigation confirm that good returns can indeed be achieved Prospects for sub Saharan Africa would be far more favorable if public development assistance particularly foreign direct investments did not show declining trends Lloyd's Maritime Directory ,1997 *Machinery Lloyd* ,1983 Assam Directory and Tea Areas Handbook ,1968 **Newspaper Management in India** Gulāba Koṭhārī,1995 **Automobile India** ,1973 **Bulletin of the Indian Coffee Board** ,1971 *Ship & Boat International* ,1988 **Machinery Market** ,1961 Vārshika Riportā India.
