Leading Issues Economic Development 6th Edition:

Catching Up Vladislav Inozemtsev, 2017-07-12 Disparities between the economic development of nations have widened throughout the twentieth century and they show no sign of closing In the nineteenth century the economic potential of developed countries was three times that of the rest of the world Today the gap is twenty times greater and the trend is increasing In this provocative reexamination of theories of accelerated development or catching up Vladislav L Inozemtsev traces the evolution of thinking about how countries lagging behind can most swiftly move forward and assesses their prospects for success in this effort Inozemtsev reviews the experience of the Soviet Union as well as the recent experience of Japan China and Southeast Asia He finds that those countries that have moved forward most rapidly have successfully adapted new technology to old processes But even then they face daunting odds as they grapple with the need to change their population's ideas and behavior And in the 1990s their rates of development have noticeably declined *Catching Up* assesses prospects for successful application of theories of accelerated development in the global economy Inozemtsev's pessimistic conclusion is that rapid industrial progress is not achievable in the information society of the twenty first century Inozemtsev reaches this conclusion after reviewing theories of accelerated development thinking from the diverse viewpoints of the 1940s and 1950s to the more intensive ideological polarization of the 1960s Inozemtsev believes it will be impossible for non Western nations to catch up with the West because of their inability to generate or control information and knowledge

The Political Economy of Development and Underdevelopment in Africa Toyin

Falola, Jessica Achberger, 2013-06-07 While Africa is too often regarded as lying on the periphery of the global political arena this is not the case African nations have played an important historical role in world affairs It is with this understanding that the authors in this volume set out upon researching and writing their chapters making an important collective contribution to our understanding of modern Africa Taken as a whole the chapters represent the range of research in African development and fully tie this development to the global political economy African nations play significant roles in world politics both as nations influenced by the ebbs and flows of the global economy and by the international political system but also as actors directly influencing politics and economics It is only through an understanding of both the history and present place of Africa in global affairs that we can begin to assess the way forward for future development *Economics and Contemporary Issues*
