Training for Catastrophe Lindsay Thomas, 2021-03-16 A timely politically savvy examination of how impossible disasters shape the very real possibilities of our world Why would the normally buttoned down national security state imagine lurid future scenarios like a zombie apocalypse In *Training for Catastrophe* author Lindsay Thomas shows how our security regime reimagines plausibility to focus on unlikely and even unreal events rather than probable ones With an in depth focus on preparedness a pivotal emergent national security paradigm since 9 11 she explores how fiction shapes national security Thomas finds fiction at work in unexpected settings from policy documents and workplace training manuals to comics and video games Through these texts as well as plenty of science fiction she examines the philosophy of preparedness interrogating the roots of why it asks us to treat explicitly fictional events as real Thomas connects this philosophical underpinning to how preparedness plays out in contemporary politics emphasizing how it uses aesthetic elements like realism genre character and plot to train people both to regard some disasters as normal and to ignore others *Training for Catastrophe* makes an important case for how these documents elicit consent and compliance Thomas draws from a huge archive of texts including a Centers for Disease Control comic about a zombie apocalypse the work of Audre Lorde and the political thrillers of former national security advisor Richard Clarke to ask difficult questions about the uses and values of fiction A major statement on how national security intrudes into questions of art and life *Training for Catastrophe* is a timely intervention into how we confront disasters

From Recovery to Catastrophe Ben Lieberman, 1998-09-01 Historians of the stabilization phase of Weimar Germany tend to identify German recovery after the First World War with the struggle to revise reparations and control hyperinflation Focusing primarily on economic aspects is not sufficient however the author argues the financial burden of recovery was only one of several major causes of reaction against the republic Drawing on material from major German cities he is able to trace the emergence of strong local activism and of comprehensive and functional policies of recovery on the municipal level which enjoyed broad political backing Ironically these same programs that created consensus also contained the potential for destabilization they unleashed intense debate over the needs of the consumers and the purpose and extent of public spending and with that of government intervention more generally which accelerated the fragmentation of bourgeois politics leading to the final destruction of the Weimar Republic
