Measuring Stellar Motion

Complete the following activities before attending the laboratory group. Detailed instructions are on the back of the activity sheets and starting Measuring Planets.

Question 1: Label the positions on the orbit to which each of the corresponding (negative) radial-velocity positions of the star are related. Assume the radial velocity is positive when the star is moving away from the Earth and negative when the star is moving towards the Earth.

Question 2: Label the positions on the planet's orbit with the letters corresponding to the radial positions of the radial velocity curve. When the radial velocity is the plus or minus of the zero, you find points of the planet's position. Remember whether the star would be used as which direction is related to velocity.
