Sustainability Assessments of Buildings Umberto Berardi, 2018-07-06 This book is a printed edition of the Special Issue Sustainability Assessments of Buildings that was published in Sustainability **Quality**

of Life in Urban Landscapes Roberta Cocci Grifoni, Rosalba D'Onofrio, Massimo Sargolini, 2017-12-14 This volume introduces an innovative tool for the development of sustainable cities and the promotion of the quality of life of city inhabitants. It presents a decision support system to orient public administrations in identifying development scenarios for sustainable urban and territorial transformations. The authors have split the volume into five parts which respectively describe the theoretical basis of the book, the policies in question and indicators that influence them, the decision support system that connects indicators to policies, the case study of Ancona Italy and potential future directions for this work. This volume is based on transdisciplinary research completed in May 2016 that involved about 40 researchers at The University of Camerino Italy and other European universities. With purchase of this book, readers will also have access to Electronic Supplementary Material that contains a database with groups of indicators of assessment of urban quality of life and a toolkit containing the data processing system and management information system used in the book's case study.

Green Planning for Cities and Communities Giuliano Dall'O', 2020-03-21 This book addresses key issues across the field of sustainable urban planning and provides a unique reference tool for planners, engineers, architects, public administrators and other experts. The evolution of cities and communities is giving rise to pressing energy and environmental problems that demand concrete solutions. In this context, urban planning is inevitably a complex activity that requires a sound analytical interpretation of ongoing developments, multidisciplinary analysis of the available tools and technologies, appropriate political management and the ability to monitor progress objectively in order to verify the effectiveness of the policies implemented. This book is exceptional in both the breadth of its coverage and its focus on the interactions between different elements. Individual sections focus on strategies and tools for green planning, energy efficiency and sustainability in city planning, sustainable mobility, rating systems and the smart city approach to improving urban scale sustainability. The authors draw on their extensive practical experience to provide operational content supplementing the theoretical and methodological elements covered in the text, and each section features informative case studies.

Energy Efficient Cities of Today and Tomorrow Jukka Heinonen, Sanna Ala-Mantila, Ortzi Akizu-Gardoki, 2021-04-01 Ongoing urbanization and ever growing harmful environmental impacts from urban areas necessitate a sustainability transformation in cities. However, cities are also centers of wealth creation and consumption which both drive environmental degradation. It is clear that cities need to re-establish themselves as low energy, low carbon systems, but the transformation is complex in many ways and time is running out. This Special Issue, *Energy Efficient Cities of Today and Tomorrow*, seeks to provide a more profound understanding of the future energy requirements of urban areas and low energy and low carbon cities. The published papers range from macro level assessments of cities manifesting themselves as forerunners in their environmental work to micro level studies of pro environmental attitudes and their impacts on individual emissions, a carbon footprint, impacts of sharing of goods and services.
