Lefebvre For Architects Thinkers For Architects:

Lefebvre for Architects Nathaniel Coleman, 2014-12-05 While the work of Henri Lefebvre has become better known in the English speaking world since the 1991 translation of his 1974 masterpiece *The Production of Space* his influence on the actual production of architecture and the city has been less pronounced Although now widely read in schools of architecture planning and urban design Lefebvre's message for practice remains elusive inevitably so because the entry of his work into the Anglosphere has come with repression of the two most challenging aspects of his thinking romanticism and Utopia which simultaneously confront modernity while being progressive Contemporary discomfort with romanticism and Utopia arguably obstructs the shift of Lefebvre's thinking from being objects of theoretical interest into positions of actually influencing practices Attempting to understand and act upon architecture and the city with Lefebvre but without Utopia and romanticism risks muting the impact of his ideas Although Utopia may seem to have no place in the present Lefebvre reveals this as little more than a self serving affirmation that there is no alternative to social and political detachment Demanding the impossible may end in failure but as Lefebvre shows us doing so is the first step towards other possibilities To think with Lefebvre is to think about Utopia doing so makes contact with what is most enduring about his project for the city and its inhabitants and with what is most radical about it as well Lefebvre for Architects offers a concise account of the relevance of Henri Lefebvre's writing for the theory and practice of architecture planning and urban design This book is accessible for students and practitioners who wish to fully engage with the design possibilities offered by Lefebvre's philosophy **The SAGE**

Handbook of Cultural Sociology David Inglis, Anna-Mari Almila, 2016-05-09 Cultural sociology or the sociology of culture has grown from a minority interest in the 1970s to become one of the largest and most vibrant areas within sociology globally In *The SAGE Handbook of Cultural Sociology* a global range of experts explore the theory methodology and innovations that make up this ever expanding field The Handbook's 40 original chapters have been organised into five thematic sections Theoretical Paradigms Major Methodological Perspectives Domains of Inquiry Cultural Sociology in Contexts Cultural Sociology and Other Analytical Approaches Both comprehensive and current *The SAGE Handbook of Cultural Sociology* will be an essential reference tool for both advanced students and scholars across sociology cultural studies and media studies

Merleau-Ponty for Architects Jonathan Hale, 2016-07-01 The philosophy of Maurice Merleau Ponty 1908 1961 has influenced the design work of architects as diverse as Steven Holl and Peter Zumthor as well as informing renowned schools of architectural theory notably those around Dalibor Vesely at Cambridge Kenneth Frampton David Leatherbarrow and Alberto Perez Gomez in North America and Juhani Pallasmaa in Finland Merleau Ponty suggested that the value of people's experience of the world gained through their immediate bodily engagement with it remains greater than the value of understanding gleaned through abstract mathematical scientific or technological systems This book summarizes what Merleau Ponty's philosophy has to offer specifically for architects It locates architectural thinking in the context of his work

placing it in relation to themes such as space movement materiality and creativity introduces key texts helps decode difficult terms and provides quick reference for further reading Architecture and Space Re-imagined Richard Bower,2016-06-10 As with so many facets of contemporary western life architecture and space are often experienced and understood as a commodity or product The premise of this book is to offer alternatives to the practices and values of such westernised space and Architecture with a capital A by exploring the participatory and grass roots practices used in alternative development models in the Global South This process re contextualises the spaces values and relationships produced by such alternative methods of development and social agency It asks whether such spatial practices provide concrete realisations of some key concepts of Western spatial theory questioning whether we might challenge the space and architectures of capitalist development by learning from the places and practices of others Exploring these themes offers a critical examination of alternative development practices methods in the Global South re contextualising them as architectural engagements with socio political space The comparison of such interdisciplinary contexts and discourses reveals the political social and economic resonances inherent between these previously unconnected spatial protagonists The interdependence of spatial issues of choice value and identity are revealed through a comparative study of the discourses of Henri Lefebvre John Turner Doreen Massey and Nabeel Hamdi These key protagonists offer a critical framework of discourses from which further connections to socio spatial discourses and concepts are made including post marxist theory orientalism post structural pluralism development anthropology post colonial theory hybridity difference and subalterneity By looking to the spaces and practices of alternative development in the Global South this book offers a critical reflection upon the working practices of Westernised architecture and other spatial and political practices In exploring the methodologies implications and values of such participatory development practices this book ultimately seeks to articulate the positive potential and political of learning from the difference multiplicity and otherness of development practice in order to re imagine architecture and space

Virilio for Architects John Armitage,2015-06-26 Paul Virilio is an innovative figure in the study of architecture space and the city Virilio for Architects primes readers for their first encounter with his crucial texts on some of the vital theoretical debates of the twenty first century including Oblique Architecture and Bunker Archeology Critical Space and the Overexposed City The Ultracity and Very High Buildings Grey Ecology and Global Hypermovement In exploring Virilio s most important architectural ideas and their impact John Armitage traces his engagement with other key architectural and scientific thinkers such as Claude Parent Benoit B Mandelbrot and Bernard Tschumi Virilio for Architects allows students researchers and non academic readers to connect with Virilio s distinctive architectural theories critical studies and fresh ideas **From Shelters to Dwellings** Ayham Dalal,2022-07-04 In Zaatari camp Jordan thousands of Syrian refugees were sheltered in tents and caravans which they steadily appropriated and turned into dwellings that responded to their social and cultural needs In this book Ayham Dalal takes a closer look at this remarkable transformation He draws on the tension

between the shelter and the dwelling to unravel how new spaces unfold in between them where refugees become architects and the camp is dismantled and reassembled From Shelters to Dwellings is the first study to uniquely combine ethnographic observations with new architectural research methods to illustrate in detail how refugees inhabit shelters It is a must read for anyone interested in understanding how camps and shelters are transformed by the powerful act of dwelling

Negotiating Conflict in Lebanon Mohamad Hafeda,2019-08-22 Drawing on innovative research into sectarian political struggle in Beirut Mohamad Hafeda shows how boundaries in a divided city are much more than simple physical divisions and reveals the ways in which city dwellers both experience them and subvert them in unexpected ways Through research based on interviews documentation of various media representations such as maps visual imagery and gallery installations Negotiating Conflict in Lebanon exposes the methods through which sectarian narratives are constructed arguing for the need to question deconstruct and transform these constructions Hafeda expands upon the definition of bordering practice by considering artistic research as a critical spatial practice which allows self reflection and transformation of border positions This study offers an alternative view to the mainstream narratives of what is meant by a border and provides insights methods and lessons that may be applied to other cities around the world affected by conflict

and political sectarian segregation *Architecture of the Everyday* Deborah Berke, Steven Harris, 1997-12 Essays on a vision of architecture that draws strength from its simplicity and use of common materials **Journal of the Indian Institute of Architects** Indian Institute of Architects, 1996 *The Architect* , 1872 *Architect* , 1872 *Kant for Architects* Diane Morgan, 2017-09-11 This book introduces architects to a philosopher Immanuel Kant whose work was constantly informed by a concern for the world as an evolving whole According to Kant in this interconnected and dynamic world humans should act as mutually dependent and responsible subjects Given his future oriented and ethico politically concerned thinking Kant is a thinker who clearly speaks to architects This introduction demonstrates how his ideas bear pertinently and creatively upon the world in which we live now and for which we should care thoughtfully Kant grounded his enlightened vision of philosophy s mission using an architectural metaphor of the modest dwelling house Far from constructing speculative castles in the sky or vertiginous towers which reach to the heavens he tells us that his humble aim is rather to build a secure home for ourselves one which appropriately corresponds at once to the limited material resources available on our planet and to our need for firm and solid principles to live by This book also explores Kant s notions of cosmopolitics which attempts to think politics from a global perspective by taking into account the geographical fact that the earth is a sphere with limited land mass and natural resources Given the urgent topicality of sustainable development these Kantian texts are of particular interest for architects of today Students of architecture who are necessarily trained in negotiating between theory and practice gain much from considering Kant whose critical project also consisted of testing and exploring the viability of ideas so as to ascertain to what extent and crucially how ideas can have a constructive effect on the whole world and on us as active agents therein **The Social (Re)Production of Architecture** Doina Petrescu, Kim Trogal, 2017-07-14 The Social Re Production of Architecture brings the debates of the right to the city into today s context of ecological economic and social crises Building on the 1970s discussions about the production of space which French sociologist Henri Lefebvre considered a civic right the authors question who has the right to make space and explore the kinds of relations that are produced in the process In the emerging post capitalist era this book addresses urgent social and ecological imperatives for change and opens up questions around architecture s engagement with new forms of organization and practice The book asks what new kinds of social can architecture re produce and what kinds of politics values and actions are needed The book features 24 interdisciplinary essays written by leading theorists and practitioners including social thinkers economic theorists architects educators urban curators feminists artists and activists from different generations and global contexts The essays discuss the diverse global locations with work taking different and specific forms in these different contexts A cutting edge critical text which rethinks both practice and theory in the light of recent crises making it key reading for students academics and practitioners **The Architects' Journal** , 2000-05 **Goodman for Architects** Remei Capdevila-Werning, 2013-10-15 American philosopher Nelson Goodman 1906 1998 was one of the foremost analytical thinkers of the twentieth century with

groundbreaking contributions in the fields of logic philosophy of science epistemology and aesthetics This book is an introduction to the aspects of Goodman s philosophy which have been the most influential among architects and architectural theorists Goodman specifically discussed architecture in his major work on aesthetics *The Languages of Art An Approach to a Theory of Symbols* 1968 and in two essays *How Buildings Mean* 1985 and *On Capturing Cities* 1991 His main philosophical notions in *Ways of Worldmaking* 1978 also apply well to architecture Goodman s thought is particularly attractive because of its constructive aspect there is not a given and immutable world but both knowledge and reality are constantly built and rebuilt Whereas other theories such as deconstruction implicitly entail an undoing of modern precepts Goodman s conception of world making offers a positive constructive way to understand how a plural reality is made and remade Goodman s approach to architecture is not only relevant thinking in providing new insights to understanding the built environment but serves also as an illustration of analytical thinking in architecture This book shows that the methods concepts and ways of arguing characteristic of analytical philosophy are helpful tools to examine buildings in a novel and fruitful way and they will certainly enhance the architect s critical skills when designing and thinking about architecture *The Making of Place in the Global Society* Milton Edward Tong,1994

Latour for Architects Albena Yaneva,2022-03-30 Bruno Latour is one of the leading figures in Social Sciences today but his contributions are also widely recognised in the arts His theories flourished in the 1980s in the aftermath of the structuralism wave and generated new concepts and methodologies for the understanding of the social In the past decade Latour and his Actor Network Theory ANT have gained popularity among researchers in the field of architecture Latour for Architects is the first introduction to the key concepts and ideas of Bruno Latour that are relevant to architects First the book discusses critically how specific methods and insights from his philosophy can inspire new thinking in architecture and design pedagogy Second it explores examples from architectural practice and urban design and reviews recent attempts to extend the methods of ANT into the fields of architectural and urban studies Third the book advocates an ANT inspired approach to architecture and examines how its methodological insights can trace new research avenues in the field reflecting meticulously on its epistemological offerings Drawing on many lively examples from the world of architectural practice the book makes a compelling argument about the agency of architectural design and the role architects can play in re ordering the world we live in Following Latour s philosophy offers a new way to handle all the objects of human and nonhuman collective life to re examine the role of matter in design practice and to redefine the forms of social political and ethical associations that bind us together in cities *Thinkers for Architects* ,2007
