## **Leadership Training Day Participant Workbook:**

**Crew Resource Management** Eduardo Salas, Eleana Edens, Katherine A. Wilson, 2017-05-15 Crew Resource Management CRM training was first introduced in the late 1970s as a means to combating an increased number of accidents in which poor teamwork in the cockpit was a significant contributing factor. Since then CRM training has expanded beyond the cockpit for example to cabin crews, maintenance crews, health care teams, nuclear power teams, and offshore oil teams. Not only has CRM expanded across communities, it has also drawn from a host of theories from multiple disciplines and evolved through a number of generations. Furthermore, a host of methodologies and tools have been developed that have allowed the community to better study and measure its effect on team performance and ultimately safety. Lacking, however, is a forum in which researchers and practitioners alike can turn to in order to understand where CRM has come from and where it is going. This volume, part of the Critical Essays on Human Factors in Aviation series, proposes to do just that by providing a selection of readings which depicts the past, present, and future of CRM research and training.

**Risk Management and Error Reduction in Aviation Maintenance** Manoj S. Patankar, James C. Taylor, 2017-03-02 Although several U.S. and European airlines have started providing human factors training to their maintenance personnel, the academic community, some 300 academic programs in the United States and several others in Europe and Asia, has not yet started offering formal human factors education to maintenance students. The highly respected authors strongly believe in incorporating the human factors principles in aviation maintenance. This is the first of two volumes providing effective behavioural guidance on risk management in aviation maintenance for both the novice and the experienced maintenance personnel. Its practical guidelines assist both student and practising aviation maintenance personnel to develop sustainable safety culture. For the maintenance community, it provides some theoretical discussion about the Why for risk management and then focus on the How to implement a successful error reduction program. To help the maintenance community in making a strong case to their financial managers, the authors also discuss the return on investment for risk management programs. The issue of risk management is taken at two levels. First, it provides a basic awareness information to those who have little or no knowledge of maintenance human factors. Second, it provides a set of practical tools for the more experienced people so that they can be more effective in risk management and error recovery in their jobs. This invaluable book serves as a practical guide as well as an academic textbook. The book covers fundamental human factors principles from a risk management perspective. Upon reading this informative book, the audience will be able to apply the basic principles of risk management to aviation maintenance environment and they will be able to use low risk behaviours in their daily work.
