Can integrated titles improve the viewing experience? Wendy Fox, 2018 Historically a dubbing country Germany is not well known for subtitled productions But while dubbing is predominant in Germany more and more German viewers prefer original and subtitled versions of their favourite shows and films Conventional subtitling however can be seen as a strong intrusion into the original image that can not only disrupt but also destroy the director s intended shot composition and focus points Long eye movements between focus points and subtitles decrease the viewer s information intake and especially German audiences who are often not used to subtitles seem to prefer to wait for the next subtitle instead of looking back up again Furthermore not only the placement but also the overall design of conventional subtitles can disturb the image composition for instance titles with a weak contrast inappropriate typeface or irritating colour system So should it not despite the translation process be possible to preserve both image and sound as far as possible Especially given today s numerous artistic and technical possibilities and the huge amount of work that goes into the visual aspects of a film taking into account not only special effects but also typefaces opening credits and text image compositions A further development of existing subtitling guidelines would not only express respect towards the original film version but also the translator s work The presented study shows how integrated titles can increase information intake while maintaining the intended image composition and focus points as well as the aesthetics of the shot compositions During a three stage experiment the specifically for this purpose created integrated titles in the documentary Joining the Dots by director Pablo Romero Fresco were analysed with the help of eye movement data from more than 45 participants Titles were placed based on the gaze behaviour of English native speakers and then rated by German viewers dependant on a German translation The results show that a reduction of the distance between intended focus points and titles allow the viewers more time to explore the image and connect the titles to the plot The integrated titles were rated as more aesthetically pleasing and reading durations were shorter than with conventional subtitles Based on the analysis of graphic design and filmmaking rules as well as conventional subtitling standards a first workflow and set of placement strategies for integrated titles were created in order to allow a

more respectful handling of film material as well as the preservation of the original image composition and typographic film identity

unsimulated sexual intercourse the latter rendered into vertiginous 3D with his film *Love* other viewers have remained in steady awe of No's dizzying camerawork immersive visuality and expressive editing No's cinema greets the short attention spans of digital life with works of extremities and endurance for performers and spectators alike This first of its kind collection of interviews documents No's engagement with the feverish reception of his work and received ideas about his life and politics Collecting conversations with critics scholars and artists including fellow directors Matthew Barney Abel Ferrara and Harmony Korine No speaks about his process as a writer director cinematographer and editor Also examined are his engagement with developing film technology and his fascination and indebtedness to past filmmakers such as Pier Paolo Pasolini Jean Eustache Stanley Kubrick and Sam Peckinpah No discusses life in Buenos Aires and emigrating to France his use of irony and melodrama and his interest in documentary practices Throughout No explores his continuing examination of faith and secularism body and mind and the politics of spectatorship Editor Geoffrey Lokke's introduction provides a close reading of No in conversation assessing what has changed over the years in terms of the filmmaker's aesthetics and presentation of self as well as what No is reticent to articulate about his life and art

Murphy, 2007-03-15 Within the last twenty five years an enormous burst of creative production has emerged from independent filmmakers From *Stranger than Paradise* 1984 and *Slacker* 1991 to Gus Van Sant's *Elephant* 2003 and Miranda July's *Me and You and Everyone We Know* 2005 indie cinema has become part of mainstream culture But what makes these films independent Is it simply a matter of budget and production values Or are there aesthetic qualities that set them off from ordinary Hollywood entertainment In this groundbreaking new study J J Murphy argues that the independent feature film from the 1980s to the present has developed a distinct approach of its own centering on new and different conceptions of cinematic storytelling The film script is the heart of the creative originality to be found in the independent movement Even directors noted for their idiosyncratic visual style or the handling of performers typically originate their material and write their own scripts By studying the principles underlying the independent screenplay we gain a direct sense of the originality of this new trend in American cinema *Me and You and Memento and Fargo* also presents a unique vision for the aspiring screenwriter Most screenwriting manuals and guidebooks on the market rely on formulas believed to generate saleable Hollywood films Many writers present

a three act paradigm as gospel and proceed to lay down very stringent rules for characterization plotting timing of climaxes and so on while others who appear to be more open about such rules turn out to be just as inflexible in their advice Through in depth critical analyses of some of the most significant independent films of recent years J J Murphy emphasizes the crucial role that novelty can play in the screenwriting process *International Film Guide*, 1973 **Filmmaker**, 2001 **Master Shots** Christopher Kenworthy, 2013 A highly visual exploration of the best shots moves and set ups in the industry This books reveals the secrets behind each shot s success so it can be adapted to the director s individual scenes *Master Shots* Christopher Kenworthy, 2012 Enhanced by stills from famous motion pictures and computer generated images explains framing composition and camera movement for achieving a high budget look for such actions as building tension anticipating motion and developing a character s fear **Master Shots Vol 1** Christopher Kenworthy, 2011 Master Shots gives filmmakers the techniques they need to execute complex original shots on any budget By using powerful master shots and well executed moves directors can develop a strong style and stand out from the crowd Most low budget movies look low budget because the director is forced to compromise at the last minute Master Shots gives you so many powerful techniques that you ll be able to respond even under pressure and create knock out shots Even when the clock is ticking and the light is fading the techniques in this book can rescue your film and make every shot look like it cost a fortune Each technique is illustrated with samples from great feature films and computer generated diagrams for absolute clarity **Shoot Like Spielberg** Christopher Kenworthy, 2015 Spielberg makes his audience feel something whether he s shooting a kids adventure a dramatic chase or the darkest war scene The auteur always employs a core set of techniques that make each shot crystal clear and evoke the most intense emotions from the audience This book shows you how From tension to tearjerker these moves will make your scenes memorable enough to be talked about for years to come Spielberg directs films that cover everything from childhood dreams to the horrors of war He always hones in on the emotional center of a scene This book unravels the secrets of his core techniques and shows how you can use the same simple camera moves and setups to make your films full of wonder thrills and emotion *Shoot Like Scorsese* Christopher Kenworthy, 2016 Martin Scorsese directs films that range from the subtlest studies of relationships to violent gangster movies with characters who are driven to the extremes of their personality This book looks at Scorsese s key techniques showing how he uses space framing and a strong sense of direction to en sure that your films are brimming with tension shock and emotion
