Mendip Cheddar Its Gorge And Caves H E Balch:

Mendip H. E. Balch, 2013-10-22 *Mendip Cheddar Its Gorge and Caves* describes the landscape and historical background of the Swildon's Hole at Priddy. This book is divided into nine chapters that discuss the Cox's Cave and the story of discovery at Cheddar. It looks into the condition of the Gough's cave and the archaeological findings made at the Long Hole which used to be the Romano-British cave dwelling. Some of the topics covered in the book are the description of the smaller caves and cave shelters of the Gorge, features of the Great Gorge of Cheddar, portrayal of the Swallets of the Cheddar system, the medieval and post-medieval history of Cheddar, and description of the Cooper's Hole, Soldier's Hole, and Sugarloaf Rock. Other chapters examine the rock formations and rivers inside the White Spot cave as well as the types of fossils found in the Bone Hole. The physical characteristics of the tools made of stone found in the caves are presented. The last chapter is devoted to a detailed description of the trails going inside the caves at Cheddar. The book can provide useful information to archaeologists, mountain climbers, explorers, students, and researchers. *The National Union Catalog, Pre-1956 Imprints Library of Congress, American Library Association. Campbell, C. O. Hunt, James D. Scourse, D. H. Keen, N. Stephens, 2012-12-06 **STRUCTURE OF THE VOLUME AND TERMINOLOGY USED** This book contains scientific descriptions of 63 localities of at least national importance for Quaternary geology, geomorphology, and environmental change in South West England. These sites were selected by the Geological Conservation Review and are accordingly designated GCR sites. Chapter 1 provides an introduction to the Quaternary. Chapter 2 synthesizes the geomorphological development and Quaternary history of the region and outlines the principles involved in site selection. The individual GCR site descriptions form the core of the book. In the following chapters, sites are arranged and described in broad geographic areas and by research topic. This is necessitated by the widely disparate nature of the field evidence in South West England, sites demonstrating the full range of Quaternary and geomorphological features are not evenly and conveniently dispersed throughout the region, and some areas have significant gaps. Neither do the individual chapters contain sites that necessarily equate with particular site selection networks. Rather, the chosen chapter headings provide the least repetitive means of describing the sites and background material. Where possible, a chronological approach from oldest to youngest has been used to describe sites within a given chapter. Again, this approach is not always possible, and a group of sites may show variations on landform or stratigraphic evidence broadly within one major time interval or chronostratigraphic stage; inevitably, there are many overlaps.
