Islands Nature And Culture Reaktion S Earth:

Geography of Small Islands Beate M.W. Ratter, 2017-12-20 This book is dedicated to the study of the islands and their role in a globalised world Beside Coastal or Oceanic Marine Geography there is little comprehensive material about the speciality of small island geography so far This volume aims to bridge natural social and cultural science perspectives In Geography of Small Islands readers learn about the physical development of islands their cultural and political importance as well as their economic particularities This book appeals to researchers students and scholars with an interest in the special characteristics in spatialities of islands *The Routledge International Handbook of Island Studies* Godfrey

Baldacchino, 2018-06-13 From tourist paradises to immigrant detention camps from offshore finance centres to strategic military bases islands offer distinct identities and spaces in an increasingly homogenous and placeless world The study of islands is important for its own sake and on its own terms But so is the notion that the island is a laboratory a place for developing and testing ideas and from which lessons can be learned and applied elsewhere The Routledge International Handbook of Island Studies is a global research based and pluri disciplinary overview of the study of islands Its chapters deal with the contribution of islands to literature social science and natural science as well as other applied areas of inquiry The collated expertise of interdisciplinary and international scholars offers unique insights individual chapters dwell on geomorphology zoology and evolutionary biology the history sociology economics and politics of island communities tourism wellbeing and migration as well as island branding resilience and commoning The text also offers pioneering forays into the study of islands that are cities along rivers or artificial constructions This insightful Handbook will appeal to geographers environmentalists sociologists political scientists and one hopes some of the 600 million or so people who live on islands or are interested in the rich dynamics of islands and island life **Observing the Volcano World** Carina J. Fearnley, Deanne

K. Bird, Katharine Haynes, William J. McGuire, Gill Jolly, 2018-07-13 This open access book provides a comprehensive overview of volcanic crisis research the goal being to establish ways of successfully applying volcanology in practice and to identify areas that need to be addressed for future progress It shows how volcano crises are managed in practice and helps to establish best practices Consequently the book brings together authors from all over the globe who work with volcanoes ranging from observatory volcanologists disaster practitioners and government officials to NGO based and government practitioners to address three key aspects of volcanic crises First the book explores the unique nature of volcanic hazards which makes them a particularly challenging threat to forecast and manage due in part to their varying spatial and temporal characteristics Second it presents lessons learned on how to best manage volcanic events based on a number of crises that have shaped our understanding of volcanic hazards and crises management Third it discusses the diverse and wide ranging aspects of communication involved in crises which merge old practices and new technologies to accommodate an increasingly challenging and globalised world The information and insights presented here are essential to tapping

established knowledge moving towards more robust volcanic crises management and understanding how the volcanic world is perceived from a range of standpoints and contexts around the globe *Geoethics for the Future* Silvia

Peppoloni, Giuseppe Di Capua, 2024-07-13 *Geoethics for the Future Facing Global Challenges* offers the latest points of view on highly topical issues in geosciences including climate change sustainable development and energy transition enabling readers to acquire multifaceted knowledge of topics of global relevance and highlighting the importance of the issues affecting geosciences in the 21st Century The book outlines how geoethical considerations are integral in providing new insights and analyses for improving the theoretical structure of geoethics and its practical applications with an aim to create conditions for sharing perspectives on the best ways for implementing scientific action to face global anthropogenic changes Covers upcoming and current key topics and emphasizes the urgency to find reference frameworks and effective solutions to the issues associated with them Includes multifaceted analyses on relevant topics by leveraging the cross cutting contributions of experts to address urgent global and complex issues related to human Earth system interaction Provides an indispensable basis for discussion to guide scientists in considering their own responsibilities and to highlight the societal relevance of the geosciences Discusses philosophical ethical social political economic legal and theological aspects of geoscience technological applications and anthropogenic impacts on physical environment through the lens of geoethics in time of profound planetary changes Bridges the geosciences social sciences and humanities aiming to address the socio ecological crisis from multiple perspectives and with greater effectiveness **Gaining Ground** International Fund for

Animal Welfare, 2006 **Fishing for Human Perceptions in Coastal and Island Marine Resource Use Systems, 2nd Edition** Annette Breckwoldt, Wen-Cheng Wang, Hans von Storch, Beate M. W. Ratter, 2019-06-07 Human perceptions decision making and pro environmental behaviour are closely connected This Research Topic focuses on bringing together perceptions and behaviour for sustainable coastal and island marine resource use systems Management and governance of large and small scale coastal marine resource use systems function in highly complex social and ecological environments which are culturally embedded economically interest led and politically biased Management processes therefore have to integrate multiple perspectives as well as perception driven standpoints on the individual as well as the decision makers levels Consequently the analysis of perceptions has developed not only as part of philosophy and psychology but also of environmental science anthropology and human geography It encompasses intuitions values attitudes thoughts mind sets place attachments and sense of place All of these influence human behavior and action and are collected or are available within the respective marine resource use system which may support the livelihood of a large part of the local population Management and governance are not only about mediating between resource use conflicts or establishing marine protected areas they deal with people and their ideas and perceptions Understanding the related decision making processes on multiple scales and levels hence means much more than economically assessing the available marine resources or existing

threats to the associated system Over the past decade there has been a growing inter and transdisciplinary international community becoming interested in research which integrates perceptions of coastal and inland residents local and regional stakeholder groups as well as resource and environmental managers and decision makers By acknowledging the importance of the individual perspective and interest led personal views it became obvious how valuable and important these sources of information are for coastal research An increase of research effort spent on the link between perceptions and behaviour in marine resource use systems is thus both timely and needed By offering a diversity of inspiring and comprehensive contributions on the link between perceptions and behaviour this Research Topic aspires to critically enlighten the discourse and applicability of such research for finding sustainable locally identified anchored and integrated marine resource use pathways
