WASH CYCLES

Whites

This cycle introduces liquid chlorine bleach to the load at the proper time for improved whitening of your heavily soiled white fabrics. For maximum soil and stain removal, liquid chlorine bleach must be used.

Super Wash

Use this cycle for heavily soiled or sturdy items. Stain Cycle is the default option for this cycle, but it can be turned off.

Bulky

Use this cycle to wash large items such as comforters, sleeping bags and blankets. This cycle starts with a soak to thoroughly saturate large loads and is followed by medium wash action and medium spin speeds to maintain load balance.

NOTE: Use the Sheets cycle for sheets, pillowcases and towels.

Sheets

Use this cycle for sheets, pillowcases and towels. The wash action of this cycle is designed to help keep large items from tangling and balling up.

IMPORTANT: For best performance, drop items in loose heaps evenly around the basket wall. Do not load items directly on the impeller for this cycle.

NOTE: Use the Bulky cycle for comforters, sleeping bags and blankets.

Normal

Use this cycle for normally soiled cottons and mixed fabric loads.

Wrinkle Control

Use this cycle to wash loads of noniron fabrics such as sport shirts, blouses, casual business clothes, permanent press and blends. This cycle uses a low-speed spin and a cool down process to help reduce wrinkling.

Colors/Jeans

Use this cycle for lightly soiled, dark or highly dyed natural fabrics such as cotton that may be susceptible to dye loss. For best results use cold or warm water.

Quick Wash

Use this cycle to wash small, lightly soiled loads that are needed in a hurry. This short cycle combines high-speed wash action and high-speed spin for the best cleaning and shortened dry times.

Delicate

This cycle combines low-speed wash and low-speed spin action to clean items labeled as "Hand Washable" on the garment care label. Pre Soak and Stain Cycle options are not available in this cycle.

Hand Wash

Use this cycle to wash lightly soiled garments indicating "Machine Washable Silks" or "Gentle" cycle on the care label. This cycle uses intermittent low-speed wash action and low-speed spin for optimal fabric care.

Garments are labeled "Hand Wash" because:

- The fiber construction may be sensitive to wash action.
- The fabric contains sensitive dyes that may bleed.

Clean Washer

Use the Clean Washer cycle once a month to keep the inside of your washer fresh and clean. This cycle uses a higher water level in combination with 1 cup (250 mL) of liquid chlorine bleach added to the bleach dispenser to thoroughly clean the inside of your washing machine.

IMPORTANT: Do not add detergent to this cleaning cycle. Use only liquid chlorine bleach. Do not place garments or other items in the washer during the Clean Washer cycle. Use this cycle with an empty wash tub.

Soak

Use the Soak cycle to help remove small spots or stains on fabrics that need extra time for removal. This cycle saturates the load with water and detergent then pauses to allow the detergent to work on soils.

MODIFIERS

Soil Level

Soil level (wash time) is preset for each wash cycle. As you press the Soil Level pad, the cycle time (minutes) will increase or decrease in the Estimated Time Remaining display and a different wash time will appear.

Spin Speed

This washer automatically selects the spin speed based on the cycle selected. The preset speeds can be changed. Spin speeds may vary by cycle.

Wash/Rinse Temp

Select a water temperature based on the type of load you are washing. Use the warmest wash water safe for fabrics. Follow garment label instructions. Warm rinses leave the loads drier and more comfortable to handle than with cold rinses. However, warm rinses also increase wrinkling. Cold rinses may help with wrinkling and save energy.

Delay Wash

You can use the Delay Wash feature to delay the start of a wash cycle for up to 10 hours.

OPTIONS

Stain Cycle

This option provides enhanced cleaning action for tough stains. The Super Wash cycle automatically includes the Stain Cycle option. Choosing the Stain Cycle option will extend your wash cycle. The Stain Cycle option should be started on a dry load only and cannot be selected after the tub has started filling with water.

Extra Rinse

An extra rinse can be used to aid in the removal of detergent or bleach residue from garments. This option provides an additional rinse with the same water temperature as the first rinse.

Pre Soak

Use this option for set-in stains and soils that need extra time for removal. Soaking in this washer is different than in a conventional washer. The washer sprays the load with water and detergent at extra-low spin speed followed by a brief period of wash action at the speed of the selected cycle. This action is repeated. Pre Soak cycles through a series of sprays and wash actions followed by a pause to allow the detergent to work on the soils. The Pre Soak feature is followed by the selected cycle. Using Pre Soak will extend your wash cycle.

End of Cycle Signal Volume

The End of Cycle Signal produces an audible sound when the wash cycle is finished. This signal is helpful when you are removing items from the washer as soon as it stops. You can select Loud, Soft or Off.
