LPG GAS DETECTION

ABSTRACT:

LPG gas detection project's main idea is to implement security system for detecting leakage of gas in closed environment. In this project, gas leakage is identified by using sensors which work only in closed environment. There have been many cases related to gas leakage which have caused damage to life and property. Implementing this application can be useful for companies, houses, which can save lives of people. This can be used as an application in chemical and hazardous industries where there is a continuous need of monitoring the gas leaks. By using different kinds of sensors for every gas we can almost identify leaks for various kinds of gases. The gas sensor is interfaced with LPC2148 and an LCD module, indicating whenever the gas is detected.

COMPONENTS REQUIRED:

- LPC2148 Development Board
- LCD Module (To print the Sensor output)
