Learn how to teach narrative and expository writing with increasing power and intimacy and how Lucy Calkins and her colleagues launch a rigorous and responsive intermediate writing workshop. Through 2 foundational books *A Guide to the Writing Workshop* and *Launching the Writing Workshop* and eight online video clips Lucy and her colleagues provide the strategies, lesson plans, and tools you'll need to lead strong, efficient writing workshops in upper elementary classrooms. *A Guide to the Writing Workshop* equips you to teach a productive, well-managed writing workshop; it introduces you to the methods that underlie all writing instruction and helps you plan a yearlong curriculum in the teaching of writing. After chronicling the guiding principles that shape a writing workshop, Lucy details the developmental stages of upper elementary writers. Ensuing chapters describe the architecture of minilessons, conferences, and small group strategy sessions and explain how the predictability of these frameworks fosters independence and self-direction. In addition to describing the management systems that make writing workshops possible, select chapters consider various ways to tailor instruction and address the demands of the contemporary classroom. In *Launching the Writing Workshop*, Lucy helps you launch both your writing workshop and your yearlong writing curriculum. While initiating students into the structures and rituals of the writing workshop, this unit also reviews and teaches the essentials of writing: collecting, drafting, revising, editing, and publishing. In addition to introducing practical strategies for finding topics and generating writing, children practice the strategy of making movies in their minds and writing so readers can picture exactly what is happening. Students also learn the value of focusing on small moments in such detail that readers feel they are experiencing the event. Through the eight accompanying video clips, Lucy and her colleagues open the doors of their classrooms and invite you to eavesdrop on their elementary writing workshops. These live from the classroom video clips are supported and enhanced by an optional voice-over coaching commentary from Lucy that explains the teaching moves and strategies. Video clips are free for 6 months upon registration. You must register within 6 months of purchase. Learn more about these resources and the series at www.unitsofstudy.com. Kafai,Quinn Burke,2016-09-02 Why every child needs to learn to code the shift from computational thinking to computational participation Coding once considered an arcane craft practiced by solitary techies is now recognized by educators and theorists as a crucial skill even a new literacy for all children Programming is often promoted in K 12 schools as a way to encourage computational thinking which has now become the umbrella term for understanding what computer science has to contribute to reasoning and communicating in an ever increasingly digital world In Connected Code Yasmin Kafai and Quinn Burke argue that although computational thinking represents an excellent starting point the broader conception of computational participation better captures the twenty first century reality Computational participation moves beyond the individual to focus on wider social networks and a DIY culture of digital making Kafai and Burke describe contemporary examples of computational participation students who code not for the sake of coding but to create games stories and animations to share the emergence of youth programming communities the practices and ethical challenges of remixing rather than starting from scratch and the move beyond stationary screens to programmable toys tools and textiles **The Power of Story** Joan Wink Ph.D.,2017-11-07 Through this book readers will discover that stories can move the human heart and head in ways that research cannot Stories bring together readers writers librarians teachers students and families in the libraries of today and will continue to do so tomorrow Written for all those lovers of literacy this book links libraries and literacies through the power of stories The book is not filled with data in the form of pie charts graphs and tables Rather the truth of the research is grounded in authentic stories that reflect not only the interpretation of data but also the transformative nature of literacies and libraries The author s primary goal is that readers will come to value and use storytelling in their own professional and personal lives to explain and expand on complex concepts and to make information more accessible for all The book begins by presenting anecdotes and the author s personal story to lay the foundation for what literacies are and what literacy is not An activity Spiral of Literacy allows readers to reflect on their own literacies Chapters that follow each begin with a story that sets the theoretical foundation Each chapter concludes with an action section that demonstrates how to turn theory to practice whether you are in a library a classroom or at home A final chapter envisions what libraries might look like in 10 years through interviews with librarians teachers and

others interested in literacy
