

## SETTINGS AND ADJUSTMENTS

### CR 125 2011 - WR 125 2011

#### Coolant level check

Check level (1) in right-hand radiator when engine is cold (place the motorcycle so that it is perpendicular to the ground). The coolant should be approximately 0.39 in. above the cells.

The radiator cap features two locking positions: the first one is for prior discharge of pressure from the cooling system.

Avoid removing radiator cap when engine is hot, as coolant may spout out and cause scalding.

Difficulties may arise in eliminating coolant from painted surfaces. If this occurs, wash off with water.
