Change Management for Quality Improvement. A Case Study of the Mid Staffordshire Hospital Scandal

Leonard Kahungu,2018-07-09 Case Study from the year 2018 in the subject Health Public Health grade 70 00 language English abstract Guaranteeing that the National Health Service Organisations and the affiliated human resources deliver high quality and equitable care is one of the major priorities in the contemporary health services Yet the metrics necessary to evaluate the quality and assurance of the healthcare is a matter subject to continuous debate In the recent past the concerns associated with the quality of care has attracted wide ranging interests particularly by the Mid Staffordshire Hospital scandal An inquiry report into the Mid Staffordshire NHS Foundation Trust the Francis Report released on February 2013 paints a grim picture of the events that transpired during fermentation of the scandal Unfortunately these events led to the loss of lives due to issues which could have been managed or addressed better Briefly the Stafford and Cannock Chase hospitals decided to pursue the Foundation Trust in 2005 which was subsequently granted in 2008 However abnormally high death rates raised eyebrows from various quarters triggering the formulation of the taskforce to look into the matter It is largely believed that the scandal was triggered by the quest of the managers to cut down the operational costs and accomplish the minimum labour requirements in attempts to achieve the foundation status and qualify for the NHS trust funds This indicates that the scandal was as a result of catastrophic organisational challenges that were triggered by poor change management

How Did Britain Come to This? Gwyn Bevan,2023-10-23 If every system is perfectly designed to get the results it gets what is wrong with the design of the systems that govern Britain And how have they resulted in failures in housing privatisation outsourcing education and healthcare In How Did Britain Come to This Gwyn Bevan examines a century of varieties of systemic failures in the British state The book begins and ends by showing how systems of governance explain scandals in NHS hospitals and the failures and successes of the UK and Germany in responding to Covid 19 before and after vaccines became available The book compares geographical fault lines and inequalities in Britain with those that have developed in other European countries and argues that the causes of Britain s entrenched inequalities are consequences of shifts in systems of governance over the past century Clement Attlee s postwar government aimed to remedy the failings of the prewar minimal state while Margaret Thatcher s governments in the 1980s in turn sought to remedy the failings of Attlee

s planned state by developing the marketised state which morphed into the financialised state we see today This analysis highlights the urgent need for a new political settlement of an enabling state that tackles current systemic weaknesses from market failures and over centralisation This book offers an accessible analytic account of government failures of the past century and is essential reading for anyone who wants to make an informed contribution to what an innovative capable state might look like in a post pandemic world

Medical Accident Liability and Redress in English and French Law Simon Taylor, 2015-06-11 In 2002 France introduced an out of court settlement scheme for medical accidents The scheme guarantees compensation for the victims of the most serious medical accidents irrespective of fault and operates in parallel with existing liability rules In this book Simon Taylor compares English and French law on medical accident liability and redress and considers what lessons the French model can provide for potential reform in England and elsewhere Taylor emphasizes the effect of the English and French rules on access to compensation and on the cost of liability and examines the problems that have been posed by the introduction of an administrative redress scheme in France This book looks at the potential consequences of English and French rules for the doctor patient relationship and for patient safety and considers the role that national legal traditions and cultures of civil liability in England and France play in shaping national law in this area

Healthcare, Quality Concerns and Competition Law Theodosia Stavroulaki, 2023-01-26 Market driven healthcare is massively divisive Opponents argue that a competition approach to medical treatment negatively impacts on quality while advocates point to increased efficiencies This book casts a critical eye over both positions to show that the concerns over quality are in fact real Taking a two part approach it unveils the fault lines along which healthcare provision and the pursuit of quality would in certain cases clash It then shows how competition authorities can only effectively assess competition concerns when they ask the fundamental question of how the concept of healthcare quality should be defined and factored into their decisions Drawing on UK US and EU examples it explores antitrust and merger cases in hospital medical and health insurance markets to give an accurate depiction of the reality and challenges of regulating competition in healthcare provision

The Report of the Morecambe Bay Investigation Bill Kirkup, Morecambe Bay Investigation, 2015 For the great majority pregnancy and childbirth should be a positive and happy experience that culminates in a healthy mother and baby This means however that on those occasions when things do go wrong the effects are even more devastating than in other areas of healthcare Maternity care must reconcile these dual aspects in order to be safe effective and responsive When it does not the consequences may be stark This Report details a distressing chain of events that began with serious failures of clinical care in the maternity unit at Furness General Hospital part of what became the University Hospitals of Morecambe Bay NHS Foundation Trust The result was avoidable harm to mothers and babies including tragic and unnecessary deaths What followed was a pattern of failure to recognise the nature and severity of the problem with in some cases denial that any problem existed and a series of missed opportunities to intervene that involved almost every level of the NHS These events

have finally been brought to light thanks to the efforts of some diligent and courageous families who persistently refused to accept what they were being told Those families deserve great credit This Report includes detailed and damning criticisms of the maternity unit the Trust and the regulatory and supervisory system This Report sets out why that is and how it could have been avoided *Parliamentary Debates (Hansard)*.
