Middle School Digital Art Curriculum:

Art and Technology Sheyda Ardalan, Cheryl Adler Iozzo, 2021 Learn how to use digital technologies to provide a rich new entry point for art students to make meaning express their thoughts and visualize their ideas Through the lens of artistic development this book offers a wide ranging scope and sequence of over 50 technology based art lessons Each lesson plan includes the art activity learning level lesson objective developmental rationale list of materials and suggested questions to motivate and engage students The text also includes images of student work students at work and the environment of the classroom many in full color The authors pedagogical approach begins with inquiry based exploratory activities followed by more in depth digital art lessons that relate to students interests and experiences With knowledge of how technology can be used in educationally sound ways educators are better equipped to advocate for the technological resources they need By incorporating technology into the art classroom as a stand alone art medium or in conjunction with traditional studio materials teachers and students remain on top of 21st century learning with increased opportunities for innovation Book Features Guidance for technology use in the K 12 art curriculum including specifics for adopting sequential strategies in each grade Cost effective strategies that place teachers and students in a position to explore and learn from one another Developmental theories to help art teachers and curriculum designers successfully incorporate new media Engaging digital art lessons that acknowledge the role technologies play in the lives of today s young people Novel approaches to art education such as distance learning animation 3D printing and virtual reality Developing a Unit of Study on Digital Art Holly Berndt, 2016 This capstone project includes a study of how electronic technology can be integrated into the art classroom to promote student engagement and meaningful art projects What kinds of digital art can students create What are the outcomes of using electronic technology in an art classroom In order to fully understand these research questions I reviewed scholarly literature that focuses on the benefits challenges and creative use of technology in the art classroom In my action research study I used a backward design approach to create a digital art curriculum unit for my middle school students During the unit my students used a variety of electronic technology and apps to create three digital art projects Some of my findings were expected but still interesting while others were unanticipated My students were generally interested in using electronic technology during the art making process and were well behaved during the digital art unit I was also surprised to see how impressed and supportive my school administrators were of the digital art unit My last finding was that students began to feel more comfortable and understanding of electronic technology towards the end of the digital art unit The results of my research including lesson plans PowerPoint presentations photographs of students digital art work and assessment strategies are available on my website at http://www.hollyberndt.com/digital_art.html **The Manhattan Family Guide to Private Schools and Selective Public Schools, Seventh Edition** Victoria Goldman, 2016-01-08 This is the best and most comprehensive guide to Manhattan s private schools including Brooklyn and Riverdale Written by a parent

who is also an expert on school admissions this guide has been helping New York City parents choose the best private and selective public schools for their children for over 20 years The new edition has been completely revised and expanded to include the latest tuition and scholarships It now lists over 75 elementary and high schools including schools for special needs children

Authentic Secondary Art Assessment Cathy Smilan, Richard Siegesmund, 2023-09-11 Offering a contemporary overview of how visual art teachers assess learning in their classrooms this book provides an outline of the role of assessment in reporting not only student achievement but also how student assessment ties to the intrinsic and external assessments of teacher performance Compiled using stories from the classrooms of 19 visual art high school teachers who share their approaches to benchmarking student success the text encourages teachers to consider assessment both for guiding their students to achieve artistic goals and for re envisioning their own curriculum and instruction The featured assessment snapshots fall along four strands Visual Narratives and Visual Literacy Capturing Empathic Understandings and Social Engagement Measuring Risk taking and Ingenuity and Assessing Collaborative and Integrated Learning Outcomes Across these sections teacher contributors offer different perspectives for student assessment capturing a snapshot of the work of skilled practitioners and focusing on various aspects of what can be evidenced and analyzed through formative and summative evaluation The voices of university level art educators are also included to expand the range of context from curriculum and instruction content that is covered in pre service art methods courses All sections also conclude with a summary questions and discussion points Including diverse teacher voices as well as presenting assessment perspectives with an eye to the National Core Art Standards NCAS this book is ideal for pre service and in service secondary art educators as well as for use in art education teacher certification courses that focus on secondary methods and art education graduate classes in assessment

Teaching Computational Creativity Michael Filimowicz, Veronika Tzankova, 2017-05-02 Teaching Computational Creativity examines the new interdisciplinary pedagogies of today s coding intensive interactive media and design curricula Students researchers and faculty will find a comprehensive overview of educational practices pertaining to innovation fields such as digital media 3D printing agile development physical computing games dance collaboration teacher education and online learning This volume fills an important gap in the literature on creative computation as practitioners are rarely challenged to reflect on or share their teaching practices How do we design effective inter multi cross and trans disciplinary pedagogy and curricula Brought together here are essays on the pedagogies that produce the so called unicorns graduates who can code and create Here the intertwining of what many consider mutually exclusive artistic sensitivities and computational skills plays an essential role calling forth a new kind of undergraduate curriculum attuned to the interweaving of skillsets and theoretic knowledge needed to create and innovate with ever changing technologies
