Comprehension Skills

Becker's muscular dystrophy is an inherited disorder characterized by progressive, but slow, muscular weakness. Caused by a mutation in the gene encoding dystrophin (DMD), the disease is associated with diminished muscle fiber architectural integrity. The pedigree above illustrates the inheritance pattern of Becker's muscular dystrophy. Using this pedigree, answer the following questions:

1. Based on the pedigree above, does the inheritance pattern of Becker's muscular dystrophy appear to be X-linked or autosomal? What clues support your conclusion? X-linked. Males completely affected; females predominantly carriers.
2. Does the inheritance pattern of Becker's muscular dystrophy represent a dominant or recessive disorder? How do you know? Recessive. Carriers possible.
3. Individual IV-6 (marked by an asterisk) is diagnosed with Becker's muscular dystrophy. What is the likely genotype of his mother? Could this individual have inherited the disorder from his dad? His mother must be a carrier of Becker's muscular dystrophy. No, male-to-male transmission not possible.
4. What are the possible genotypes of the children of individual IV-6? Assuming this individual's partner is WT, what is the likelihood that the this individual's children have Becker's muscular dystrophy? Females may be carriers or completely wild-type. Chances of diseased phenotype is 0%, but daughters may be carriers.
5. In the third generation, a female individual (III-1) shows symptoms of Becker's muscular dystrophy. How is this possible? She has two copies of the DMD allele.
6. Name the individuals in the 4th generation that are affected by the disorder. No. 1 and 4 only.
7. Name the individual(s) in the 2nd generation that are carriers. No. 4 only.

Middle School Genetic Pedigree Activity

Rachel Sandford

Middle School Genetic Pedigree Activity:

Making a Difference: Volume I and II Sasha A. Barab, Kenneth E. Hay, Nancy Butler Songer, Daniel T.

Hickey, 2017-09-05 William Wordsworth 1770 1850 needs little introduction as the central figure in Romantic poetry and a crucial influence in the development of poetry generally This broad ranging survey redefines the variety of his writing by showing how it incorporates contemporary concepts of language difference and the ways in which popular and serious literature were compared and distinguished during this period It discusses many of Wordsworth's later poems comparing his work with that of his regional contemporaries as well as major writers such as Scott The key theme of relationship both between characters within poems and between poet and reader is explored through Wordsworth's construction of community and his use of power relationships A serious discussion of the place of sexual feeling in his writing is also included

Hard-to-teach Biology Concepts Susan Koba, Anne Tweed, 2009 The book is not a prescribed set of lessons plans

Rather it presents a framework for lesson planning shares appropriate approaches for developing student understanding and provides opportunities to reflect and apply those approaches to the five hard to teach topics Proceedings of the 11th

International Wheat Genetics Symposium, 24-29 August 2008, Brisbane, Qld., Australia Rudi Appels, 2008 The papers herein are volume 3 of the proceedings of the 11th International Wheat Genetics Symposium held in Brisbane Australia in 2008 The series presents the science of the genetic sciences applied to bread and durum wheats and other species **Journal of**
