

Installing the oven

⚠ The appliance must not be operated until it has been correctly installed in its housing unit. Otherwise it poses an electric shock hazard.

Important. Do not fit insulation material inside the housing unit. This would hinder the intake of air to the appliance.

Turn off the mains electricity supply to the isolator.

- Connect the mains cable from the oven to the isolator.
- Push the appliance into the oven housing unit and align it.

- Open the oven door and using two screws secure it to the side walls of the housing unit through the holes in the oven trim.
- Reconnect the power supply to the isolator.
