Beyond Technonationalism Kathryn C. Ibata-Arens, 2019-04-16 The biomedical industry which includes biopharmaceuticals genomics and stem cell therapies and medical devices is among the fastest growing worldwide While it has been an economic development target of many national governments Asia is currently on track to reach the epicenter of this growth What accounts for the rapid and sustained economic growth of biomedical in Asia To answer this question Kathryn Ibata Arens integrates global and national data with original fieldwork to present a conceptual framework that considers how national governments have managed key factors like innovative capacity government policy and firm level strategies Taking China India Japan and Singapore in turn she compares each country s underlying competitive advantages

What emerges is an argument that countries pursuing networked technonationalism NTN effectively upgrade their capacity for innovation and encourage entrepreneurial activity in targeted industries In contrast to countries that engage in classic technonationalism like Japan s developmental state approach networked technonationalists are global minded to outside markets while remaining nationalistic within the domestic economy By bringing together aggregate data at the global and national level with original fieldwork and drawing on rich cases Iбата Arens telegraphs implications for innovation policy and entrepreneurship strategy in Asia and beyond

Future Spacecraft Propulsion Systems and Integration Paul A. Czysz, Claudio Bruno, Bernd Chudoba, 2017-08-30 The updated and expanded third edition of this book focuses on the multi disciplinary coupling between flight vehicle hardware alternatives and enabling propulsion systems It discusses how to match near term and far term aerospace vehicles to missions and provides a comprehensive overview of the subject directly contributing to the next generation space infrastructure from space tourism to space exploration This holistic treatment defines a mission portfolio addressing near term to long term space transportation needs covering sub orbital orbital and escape flight profiles In this context a vehicle configuration classification is introduced covering alternatives starting from the dawn of space access A best practice parametric sizing approach is introduced to correctly design the flight vehicle for the mission This technique balances required mission with the available vehicle solution space and is an essential capability sought after by technology forecasters and strategic planners alike *White Paper on Science and Technology*, 2015

Dual-use life science research and biosecurity in the 21st Century: Social, Technical, Policy, and Ethical Challenges Jonathan E. Suk, Kathleen M. Vogel, Amanda Jane Ozin, 2015-06-04 In September 2011 scientists announced new experimental findings that would not only threaten the conduct and publication of influenza research but would have significant policy and intelligence implications The findings presented a modified variant of the H5N1 avian influenza virus hereafter referred to as the H5N1 virus that was transmissible via aerosol between ferrets These results suggested a worrisome possibility the existence of a new airborne and highly lethal H5N1 virus that could cause a deadly global pandemic In response a series of international discussions on the nature of dual use life science arose These discussions addressed the complex social technical political security and ethical issues related to dual use research This Research Topic will be devoted to contributions that explore this matrix of issues from a variety of case study and international perspectives Sustaining Human Progress Khalid Malik, 2014 Most people in most countries have been steadily better in human development Advances in technology and incomes hold ever greater for longer healthier more secure lives **21st-Century Statecraft** Nayef Al-Rodhan, 2022-07-28 From civilisational frontier risks associated with new challenges like disruptive technologies to the shifting nature of great power conflicts and subversion the 21st century requires a new approach to statecraft In 21st Century Statecraft Professor Nayef Al Rodhan proposes five innovative statecraft concepts He makes the case for a new method of geopolitical analysis called meta geopolitics and for dignity based governance He shows how in an interdependent

and interconnected world traditional thinking must move beyond zero sum games and focus on multi sum and symbiotic realist interstate relations This requires a new paradigm of global security premised on five dimensions of security and a new concept of power just power which highlights the centrality of justice to state interests These concepts enable states to balance competing interests and work towards what the author calls reconciliation statecraft Throughout Professor Al Rodhan brings his philosophical and neuroscientific expertise to bear providing a practical model for conducting statecraft in a sustainable way
