

### NYS Making Connections Lab Questions

1. A non-extension of the lab activity: Making Connections, a biology teacher asked students to transform variable *x* rather than *y* so that *x* would affect heart rate. The students hypothesized that eating a lunch high in protein would decrease heart rates. - A student is opening and closing clothespins as part of a lab activity. The student begins to experience muscle fatigue, and the rate at which the student is opening and closing the clothespins slows. Which graph best represents the relationship between a time and number of clothespin opened?
