useful tool for MCDA including ranking selection procedures Such material is rarely covered in courses in decision analysis Both material review questions and problems at the end of each chapter Solutions to the exercises are found in the Solutions Manual which will be provided along with PowerPoint slides for each chapter The methodologies are demonstrated through the use of applications of interest to industrial engineers including those involving product mix optimization supplier selection distribution center location and transportation planning resource allocation and scheduling of a medical clinic staffing of a call center quality control project management production and inventory control and so on Specifically industrial engineering problems are structured as classical problems in multiple criteria decision analysis and the relevant methodologies are demonstrated
