Making Practice Fun 45 More Quadratic Equations:

On Teaching Science Jeffrey Bennett, 2014-09 Focusing on solutions specific to science and math education both for KOCO12 and college this book explores how students learn in general and helps teachers develop successful techniques for the classroom. On Teaching Science is a short practical guide to key principles and strategies that will help students learn in any subject at any level but with special focus on the STEM science technology engineering and mathematics subjects. Though aimed primarily at current and future teachers the ideas covered will be of interest to anyone involved in education including parents school administrators policymakers community leaders and research scientists. The book describes how important it is to instill the notion that learning requires study and effort presents big picture ideas about teaching provides general suggestions for successful teaching and includes pedagogical strategies for success in science teaching. With a combination of personal experience and research based studies to discuss the current state of education in the United States the author shows how it can be improved through both individual educators and systemic changes.

A History of Mathematics Luke Hodgkin, 2013-02-21 A History of Mathematics From Mesopotamia to Modernity covers the evolution of mathematics through time and across the major Eastern and Western civilizations. It begins in Babylon then describes the trials and tribulations of the Greek mathematicians. The important and often neglected influence of both Chinese and Islamic mathematics is covered in detail placing the description of early Western mathematics in a global context. The book concludes with modern mathematics covering recent developments such as the advent of the computer chaos theory topology mathematical physics and the solution of Fermat's Last Theorem. Containing more than 100 illustrations and figures this text aimed at advanced undergraduates and postgraduates addresses the methods and challenges associated with studying the history of mathematics. The reader is introduced to the leading figures in the history of mathematics including Archimedes Ptolemy Qin Jiushao al Kashi al Khwarizmi Galileo Newton Leibniz Helmholtz Hilbert Alan Turing and Andrew Wiles and their fields. An extensive bibliography with cross references to key texts will provide invaluable resource to students and exercises with solutions will stretch the more advanced reader.
