When public history was imported from the United States to China around the turn of the twenty first century it was introduced as a sub field within history and has developed along that path ever since Professional historians in China even some forward looking ones see public history as merely presenting a change in the patterns of participation in history making This book offers a sharply different view It contends essentially that public history represents more than a research domain within history or within any existing discipline nor does it fit into any established narratives but rather a fundamental change of the entire process of history making in China In this process the public is prosuming history Public history makes obsolete the old structure for building and acquiring historical knowledge it challenges the old assumptions supersedes the rigid academic hierarchy and stirs the imaginations of the multitudes With an assemblage of
