Jobs Eor 2015 2016 At Sandf:

South Africa's Post-Apartheid Military Lindy Heinecken, 2020-01-01 This timely book examines how the South African National Defence Force has adapted to the country's new security political and social environment since 1994. In South Africa's changed political state, how has civilian control of the military been implemented and what does this mean for defence in a democracy? This book presents an overview of the security environment, how the mission focus of the military has changed and the implications for force procurement, force preparation, force employment and force sustainability. The author addresses other issues such as the effect of integrating former revolutionary soldiers into a professional armed force, the effect of affirmative action on meritocracy, recruitment and retention, military veterans looking at the difficulties they face in reintegrating back into society and finding gainful employment, gender equality and mainstreaming the rise of military unions and why a confrontational instead of a more corporatist approach to labour relations has emerged. HIV/AIDS and the consequences this holds for the military in terms of its operational effectiveness. In closing, the author highlights key events that have caused the SANDF to become lost in transition and transformation, spelling out some lessons learned. The conclusions she draws are pertinent for the future of defence security and civil military relations of countries around the world.

The South African Response to COVID-19 Pieter Fourie, Guy Lamb, 2023-03-28 This book analyses the first two years of South Africa's response to the COVID-19 epidemic from its emergence in early 2020. Drawing on the perspectives of a range of public health experts, economists and other social scientists and development practitioners, this book argues that understanding this early response will be essential to moderate and improve future policy thinking around health governance and epidemic readiness. This book provides a systemic analysis of not only the epidemiological progression of COVID-19 in South Africa but also the socio-political factors that will be key in determining the future of the country as a whole, including health system challenges, socio-economic disparities and inequalities and variable, often contradictory and tardy policy responses. Overall, this book exposes Manichean thinking and the spurious policy dichotomies that pitch public health against human rights, economic recovery against viral vector control and science against ideology, with lessons not just for South Africa but also for elsewhere on the African continent and beyond. This book will be perfect for researchers and practitioners across Public Health, Health Policy and Global Health as well as those with an interest in South African politics and development more generally.
