Pakistan's rapidly growing population, nuclear arsenal and relationships with China and India will continue to force it upon America's geostrategic map in new and important ways over the coming decades. This book explores the main trends in Pakistani society that will help determine its future, traces the wellsprings of Pakistani anti-American sentiment through the history of U.S.-Pakistan relations from 1947 to 2001, assesses how Washington made and implemented policies regarding Pakistan since the terrorist attacks on the United States on September 11, 2001, and analyzes how regional dynamics, especially the rise of China, will likely shape U.S.-Pakistan relations. It concludes with three options for future U.S. strategy: described as defensive insulation, military first, cooperation, and comprehensive cooperation. The book explains how Washington can prepare for the worst, aim for the best, and avoid past mistakes.

Committee on Commerce, Science, and Transportation. Subcommittee on Merchant Marine, 1988 **Motor Age**, 1927 *Technology Application in Tourism in Asia* Azizul Hassan, 2022-03-02

This book very specifically focuses on technology application in tourism in Asia. The book contains twenty-seven chapters in four sections: i.e. theories, innovations, practices, and future research directions, based on the intriguing qualities and importance of technology applications in the Asian tourism business. This book is a blend of comprehensive and extensive efforts by the contributors and editor, designed to extensively cover technology applications in tourism in Asia, including distinct topics such as mobile computing, new product designs, innovative technology usages in tourism promotion, technology-driven sustainable tourism development, location-based apps, mobility, accessibility, the post-crisis situation of COVID-19, etc. This book is a significant contribution towards the very limited knowledge of technology applications in tourism, with selected examples of Asian countries. The importance of technology in Asian tourism is rapidly increasing and has led to a rise in luxury, allowing citizens to enjoy leisure travel over both long and short distances. The rise of low-cost airlines and the region's growing affluent middle class have changed the tourism environment dramatically. More tourists are booking their holidays online as a result of technological advancements. Online travel is the most important and well-established aspect of Asia's Internet economy. Considering the ongoing trend of technology applications in the tourism industry in Asia, more research attempts like this book need to be made, aiming towards exploring diverse aspects. As tourism is an expanding area, this book can serve as a reading companion for tourism students, policy planners, and industry professionals. This book is expected to be appreciated by expatriate researchers and researchers having a keen interest in the Asian tourism industry.
