Linde Hydraulic Control (LHC)

Digital electro-hydraulic controller

Instead of a control unit, an integrated engine unit houses the electro-hydraulic controller. Instead of a hydraulic controller, a computer electronic controller is used. It is a very powerful microcontroller system, it controls functions for the drive unit and the working hydraulics (2).

Adaptation to various trucks

The electronic control unit is capable of controlling trucks from a variety of series and with different drive engines. To use different truck parameters and sensors, each truck model has a coding that uniquely identifies the truck.

Troubleshooting

The processor of the electronic control unit analyzes analogue and digital signals. The processor interprets digital messages and system errors, and displays an error message on the display/monitor on the control interface. In addition, the control unit activates a variety of functions according to the error's highest priority.

- Working light failure
- Non-secure detection of the manual emergency stop
- The truck brakes with automatic emergency stop and off the engine mode
- The manual brake on the emergency function, the manual emergency stop system activates
- An error code appears on display

These functions can be activated by switching off the emergency stop and the engine. During a restart, the control unit checks whether the error is still present. If the error is no longer present, the truck returns to normal operation. If the error persists, the error code appears on the display and one of the measures listed above is carried out.

Changing the controller

4.1.1.1.1.1.1

Problems regarding component damage due to electrostatic discharge (ESD) damage to working elements will occur if the controller is moved.

The controller is equipped with a "float plug" which is attached to the back to avoid static buildup. Connections must never be left open. The upper part of the controller and the software version of the controller can be read out via the back connector.

If the controller is replaced, the personnel using the controller must be notified and they adapted to the code format. All necessary information is available on the code format.
