**Microsoft Project 2013 - Real World Scheduling** John Buttelerwerth (Illustrator), 2015-07-01 Microsoft Project 2013 Real World Scheduling is called real world because the author wrote it drawing upon his 30 years of experience consulting with contractors to help them meet their construction scheduling software needs He knows how contractors use scheduling software what's important to them and what is not This manual has been tested and retested in both the classroom and the company training room It will guide you thru some of the quirks of MS Project 2013 as well as teach you how use the software the way contractors use it Other software manuals are often hundreds of pages long filled with dense text that wastes your time trying to cover every corner and nuance of the software ultimately leaving readers more confused than before they started Microsoft Project 2013 Real World Scheduling assumes that the reader has no previous exposure to the software and takes the reader through the process of creating a schedule covering the same features that a contractor would include on their typical schedule This includes creating and saving the schedule covering numerous formatting options to customize the look of the schedule working with calendars including 50% and 100% weather calendars then activity coding the schedule to organize the tasks using both Custom Task Groups and Summary Tasks Different views of the schedule are explored and from there the schedule is resource loaded and cost loaded including a real world analysis of an over allocation of resources The schedule is then Baselined and updated covering all possible update scenarios that may actually occur With this manual and a few hours of your time you will be ready to effectively use MS Project 2013 on a real project Project 2013 Axzo Press Staff, 2013-06-13 Advanced Student Manual *Microsoft Excel 2019 for Lawyers Training Manual Classroom in a Book* TeachUcomp , 2019-10-27 Complete classroom training manuals for Microsoft Excel 2019 for Lawyers 479 pages and 224 individual topics Includes practice exercises and keyboard shortcuts You will learn how to effectively use legal templates legal business functions such as the Pv and Fv functions and simple IOLTA management In addition you'll
